INTERPORTPOLICE

Who we are?

INTERPORTPOLICE:

- A non-profit organisation linking those involved in policing and security.
- INTERPORTPOLICE is an international organization established to share expertise and best practice on protective security to help mitigate the risks associated with the threat from terrorism, criminality, sabotage, and theft at seaports, airports, transport systems and publicly accessible locations.
- <https://interportpolice.org/>

INTERPORTPOLICE

Who we work with ?

- We work with police, security authorities and international organisations to help identify risks to and reduce vulnerability and support the highest standards of protective security.
- We focus in particular on aviation, maritime, transportation, critical national infrastructures and borders.
- Our primary partners are those authorities and international partners who have responsibility for security and safety.

INTERPORTPOLICE

What we do?

Facilitate optimal security and safety practices through the provision of:

- Best practice guidance,
- Development of international standards and recommendations,
- After action reviews
- Collaborative information sharing,
- Operational training

INTERPORTPOLICE

What we do?

We leverage authorities' capacity to provide assurance and resilience against the threat of trans-national terrorism, criminality, and sabotage. Working together we provide a more secure and collaborative environment.

We link with Police and security providers around the globe to enable networking collaboration through:

- Conferencing
- Knowledge resource
- Security audits
- On line or venue education and training

INTERPORTPOLICE

Our links with the US Morrone 9/11 Center

THE MORRONE 9/11 CENTER:

- Associated by an MOU with INTERPORTPOLICE
- Morrone 9/11 Center provides education, research, collaboration, and best practices for programs and projects that assist governments, authorities, and other security-eligible organizations worldwide with assistance and guidance for the security and safety of mass people environments, helping to make the world a safer and more secure place.

The 21st Century Crisis

Are you prepared?

- Multiple failures
- Cascading consequences
- Trans-boundary
- Multi-jurisdictional
- Catastrophic infrastructural failures
- No clear solution
- No model of response
- No single point of responsibility

Challenges of terrorism and serious organised crime

Terrorism

- Creates fear and demoralization
- Media exposure for the cause
- Creates a balance between terror and military power
- Political change

Serious organised crime

- Profit – financial gain

Other Challenges

Natural disasters
Safety related incidents
Civil disturbances

INTERPORTPOLICE

To be resilient organisations need to:

- Adapt to the 21st Century Risks
- Recognise and learn from past events
- Support efficient and effective communication
- Ensure senior leadership commitment
- Identify problems early and take action
- Develop and ensure a positive organisational culture
- Address emerging and current challenges

You Will Not Be Resilient If You Do Not Change – CSBP can help

Community Security Best Practices - CSBP

Have you heard the following phrase?

“Never going to happen here”

Organisations that are not prepared are vulnerable which can lead to catastrophic consequences, loss of life, severe financial cost, an enquiry, challenging questions, and reputational damage

- **PROTECT**
- **PREVENT**
- **PREPARE**

Community Security Best Practice

Strategic Objectives

- Deter and prevent terrorist attacks and criminal or hostile acts in the airport and seaport domain
- Protect transportation authorities and national governments and their interests
- Mitigate damage and expedite recovery
- Minimize the impact on the aviation transportation system, the community and national economy
- Actively engage domestic and international partners

Principles

- Maximize domain awareness
- Deploy layered security
- Promote a safe, efficient, and secure maritime (and aviation) transportation system
- Enhance national and international cooperation
- Assure continuity of the aviation transportation system

CSBP document suite provides information and guidance on:

- Risk and vulnerability assessments
- Insider threat mitigation
- Intelligence gathering and sharing
- Engaging your community
- Security assurance process and practices
- Self assessment security audits
- Organisation security culture development and assessment
- Supports identification of required improvement

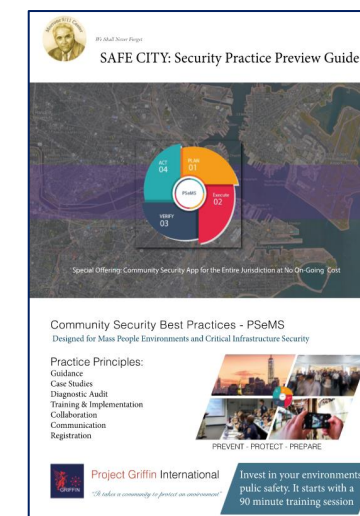

Community Security Best Practice

Community Security Best Practice

The CSBP brings together:

- Principles of Protective Security Management Systems (PSeMS)
- Learnings from Project Griffin International (PGI),
- Community engagement initiative - See Act Say
- Observations and recommendations from evidence based practices from international counterparts involved in security (e.g., United Nations Agencies, NATO, US – DHS/ FEMA, UK and EU law enforcement & security authorities)

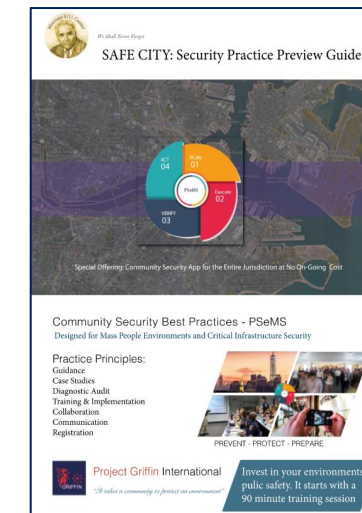

Combined this forms a methodology and approach that supports security assurance and resilience.

What is Community Security Best Practice – CSBP

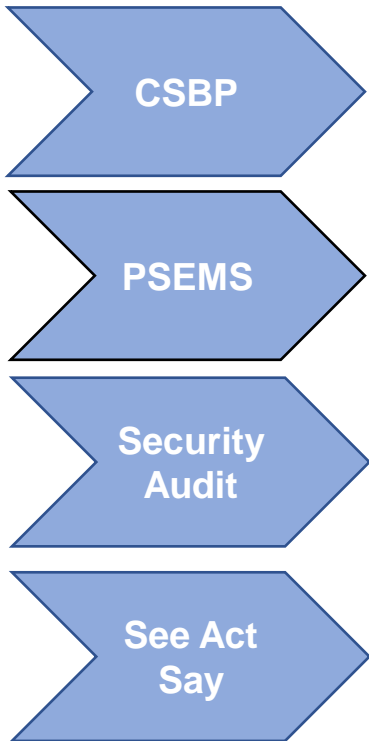

- Practical methods used to prevent, detect, deter and deny hostile intent
- Practices that will enable an organisation to assure security resilience
- Principles and practices to provide an organisation with day to day security assurance
- Guidance to help mitigate organised crime, terrorism and theft
- Prepares organisations for agile and flexible response threats
- Recommendations based evidence and learnings from past events
- Guidance for self-assessment security audits
- Guidance that will assist in providing and managing community policing and security across all domains

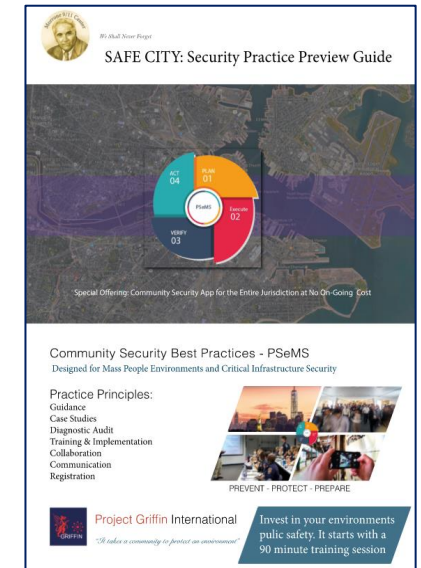

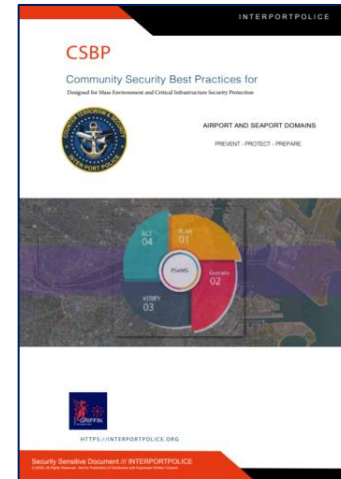

INTERPORTPOLICE

Community Security Best Practice (CSBP) documentation suite

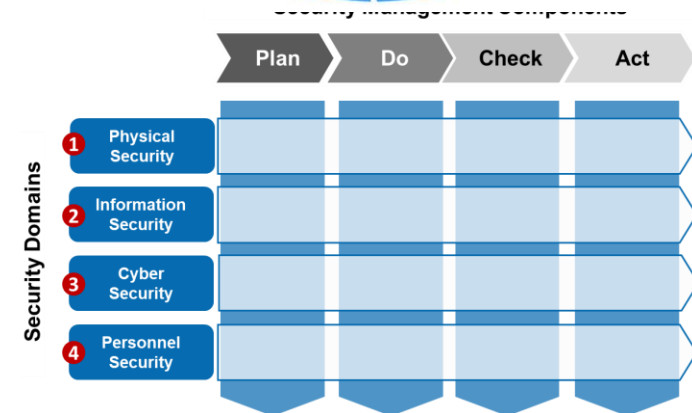

- Comprehensive Best Practice Guide
- Security Management System Guidance
- Security system risk and vulnerability assessment
- Community engagement initiative

Protective Security Management Systems

- PSeMS is an organisation's systematic approach to managing security risks incorporating security management into daily activities of an organisation
- It provides the necessary organisational structure, accountabilities, policies and procedures to ensure effective oversight
- PSeMS is an assurance system for organisational security across all domains of the organisation

Security Audit

See Say Act (1/2)

SSA is an evidenced based community engagement programme

- See Say Act is a proven community engagement initiative, it forms part of our 3 pillar strategy to educate, collaborate and communicate with staff and your environment community
- Provides a means to increase knowledge and build confidence in reporting whilst keeping people informed
- Develops trust and fosters a positive security culture, it is low cost and involves everyone in the organisation

FORMAT AND DISTRIBUTE ACROSS CHANNELS

Once data is fed into the system, Atlas One will automatically reformat and distribute alerts, incident, and event information across all of your digital channels, such as Twitter, Facebook, Instagram, and mobile app.

Provides simple and effective two-way communication – managed by the Authority

Atlas One Communications – Trusted By Leading Authorities

GEO-FENCED ANNOUNCEMENTS AND ALERTS

When a person scans a QR SAFE LINK code, they can instantly report safety issues, suspicious activity, and even chat with security or operations teams.

Every QR code can be programmed to run advanced automations, rules, and workflows when scanned, improving the operational response to incidents.

Message everyone or a specific area

With location-based announcements and nearby safety alerts

Communicate

OMNICHANNEL CUSTOMER SUPPORT

Centralize incoming support and service requests, from every digital channel, into a unified inbox where your operations team can quickly triage, respond, and resolve incoming incident reports. Create automated rules and workflows to save time and improve public safety outcomes and rapid response.

Communicate

RAPID RESPONSE COORDINATION

For any 999/111/911 calls or incident reported, automatically trigger rules and workflows to instantly notify and connect the right people and assets, through a secure internal messaging platform.

Instantly connect operations teams, security personnel, and first responders

Communicate

ALL-IN-ONE DIGITAL CITIZEN ENGAGEMENT FOR PUBLIC SAFETY

The most advanced community engagement platform ever built
Designed so government and public safety organizations can communicate, engage, and support their mass community environment with the same sophistication, scale, and precision as the world's leading brands.

Automate alerts to the public about active incidents and issues

Communicate across all of your digital channels
