**REPORT OF THE MARINE ENVIRONMENT PROTECTION COMMITTEE
ON ITS SIXTY-FIRST SESSION**

Corrigendum

Annex 1

Resolution MEPC.192(61) – 2010 Guidelines for monitoring the worldwide average sulphur content of fuel oils supplied for use on board ships

Paragraph 11 is replaced by the following¹:

"11 The reference value of the world wide average sulphur content of residual and distillate fuels supplied for use on board ships should be A_{wx} , where $x=r, d$, and $A_{wx} = A_{cr}$ as calculated in January of the year following the first three years in which data were collected on the basis of these Guidelines. A_w should be expressed as a percentage."

¹ This corrigendum does not affect the results of sulphur monitoring already carried out for 2010 (MEPC 62/4), 2011 (MEPC 64/4), 2012 (MEPC 65/4/9) and 2013 (MEPC 67/4).
