Ref. T/16 Circular letter No.2683 30 November 2005

To: All IMO Member States

Subject: Global Integrated Shipping Information System (GISIS) – port reception facilities database

- As suggested by FSI 13 and approved by MEPC 53, the Secretariat has developed an Internet-based port reception facility database (PRFD) as a module of the IMO Global Integrated Shipping Information System (GISIS), with the aim of facilitating global access to information on port reception facilities around the world and promoting the exchange and accuracy of that data.
- 2 Information on the GISIS system, including the Manual for Member States' Administrations, has been communicated to Member States by means of Circular letter No.2639 dated 8 July 2005.

Information provided by the PRFD

- The PRFD provides information on the available port reception facilities for the delivery of the following categories of ship-generated waste:
 - .1 Oily waste (oily bilge water, oily residues (sludge), oily tank washings (slops), dirty ballast water, scale and sludge from tank cleaning, and oily mixtures containing chemicals;
 - .2 NLS waste (Categories A, B, C and D;
 - .3 Garbage;
 - .4 Sewage;
 - .5 Ozone-depleting substances and equipment containing such substances; and
 - .6 Exhaust gas-cleaning residues.
- For each one of the above waste categories the information set out at annex 1 would be provided in the database.
- 5 The PRFD also contains information regarding:
 - the procedure for reporting alleged inadequacies of port reception facilities, including a copy of the consolidated reporting format (MEPC/Circ.469);
 - the contact details of the national Authorities responsible for handling reports on alleged inadequacies of reception facilities, including their e-mail addresses; and

- cases of alleged inadequacies of port reception facilities reported to IMO and the follow-up response by the port States.

PRFD design

- The PRFD has been designed to allow the competent authorities of the Member States to update the database by introducing new entries, editing or deleting existing records pertaining to port facilities operating under their jurisdiction. Access to this interactive function of the database is strictly via a log-in password provided to Member States, to ensure authentication of the information contained in the PRFD (Circular letter No.2639).
- The PRFD will be available to the general public through the GISIS web-page on a view-only basis for 24 hours a day with the possibility of searching the database and retrieving information on the available reception facilities per country, port and specific type of waste(s).

Data already populated in the database

The PRFD has already been populated by the IMO Secretariat with data on port reception facilities for the reception of oily waste and noxious liquid substances by using the available data contained in MEPC.3/Circ.4 and MEPC.4/Circ.5 circulars respectively. However, in some cases the data contained in the aforementioned circulars were not fully compatible with the layout of the PRFD and the Secretariat had to make a number of adjustments. **Therefore, these data should be carefully reviewed and validated by the Member States**.

Action requested of Member States

- 9 Prior to the database being made available to the general public, Member States are invited to:
 - .1 review the existing data on port reception facilities for the reception of oily waste and noxious liquid substances contained in the database, with the aim of checking their accuracy, amending them as necessary and including any additional available data;
 - .2 populate the database with initial information on port reception facilities for the delivery of garbage, sewage, ozone-depleting substances and equipment containing such substances, and exhaust gas-cleaning residues; and
 - .3 provide the contact details of the national Authorities responsible for handling reports on alleged inadequacies of reception facilities.
- In order to allow this exercise to be conducted in a smooth and efficient manner, a timeframe of three months will be allocated for this process. At the end of this trial period (1 March 2006) the database will go live to the public. If during the trial period Member States should encounter any problems whilst inputting the information, they should contact IMO at e-mail address: info@imo.org or by fax +44 20 7 587 32 10.
- Brief instructions on how to manage the data in the PRFD via the GISIS website are attached at annex 2.

ANNEX 1

INFORMATION ON AVAILABLE PORT RECEPTION FACILITIES

The following information should be provided, as appropriate, in the database for each port of each Member State:

Service provider	Name			
1	Address			
	Telephone			
	Telex			
	Fax			
	E-mail			
	Website			
Type of facility	Select one or more from:			
	F (fixed)			
	T (tanker or barge)			
	Tr (tank truck/portable tank)			
	Other (specify)			
Discharge restriction/or limitations	Minimum quantity (m ³) Maximum quantity (m ³)			
	Maximum discharge rate (m ³ /h)			
	Other (specify)			
Availability of the reception facility	24 hours a day, 7 days per week			
	24 hours a day, 5 days per week			
	Business hours only, 7 days per week			
	Business hours only, 5 days per week			
	Other (specify)			
Minimum prior notice required	(hours)			
Charging system	Select one from:			
	Free-of-charge			
	Cost included in port dues			
	Cost charged in addition to other services			
	Other (specify)			
Additional information	(free text)			
Last updated	(date)			

ANNEX 2

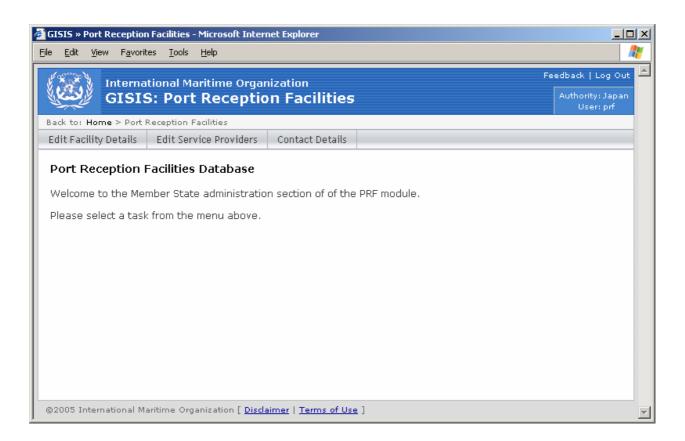

BRIEF INSTRUCTIONS ON HOW TO MANAGE THE DATA IN THE PRFD

Member State Access to the GISIS Port Reception Facilities (PRF) Module

As part of the integrated GISIS system, access to the PRF module is via the GISIS Members' website at https://gisis.imo.org/Members.

The national Administrator for GISIS accounts is required to create user accounts with the appropriate privilege for accessing the PRF module. (The User Administration Manual for creating accounts and granting privileges is provided in Circular letter No.2639.)

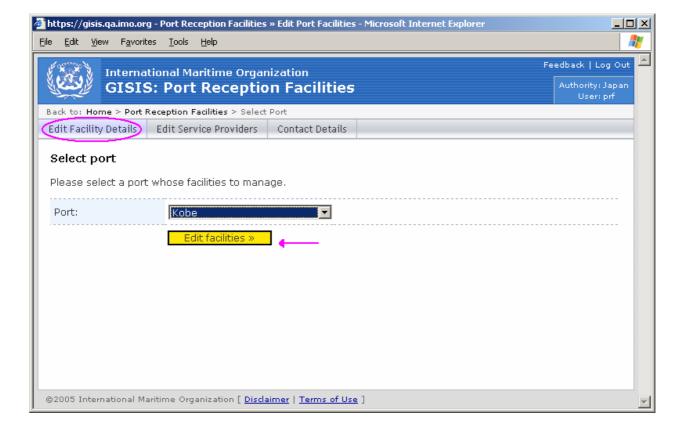

The following screenshot illustrates an example of a user account. Upon logging into the GISIS Members' Area, the user with the appropriate privilege for accessing the PRF data will encounter the welcome screen as shown below:

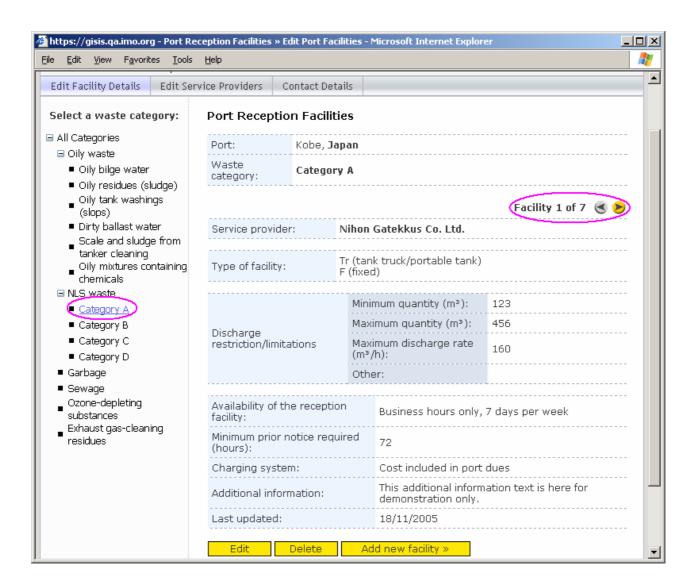

Reviewing existing data

Member States are requested to check the baseline data entered by the Secretariat on port reception facilities for the reception of oily waste and noxious liquid substances.

To check the facilities at each port, first click on **Edit Facility Details** on the top menu. Then select the port from the list, and click the button below:

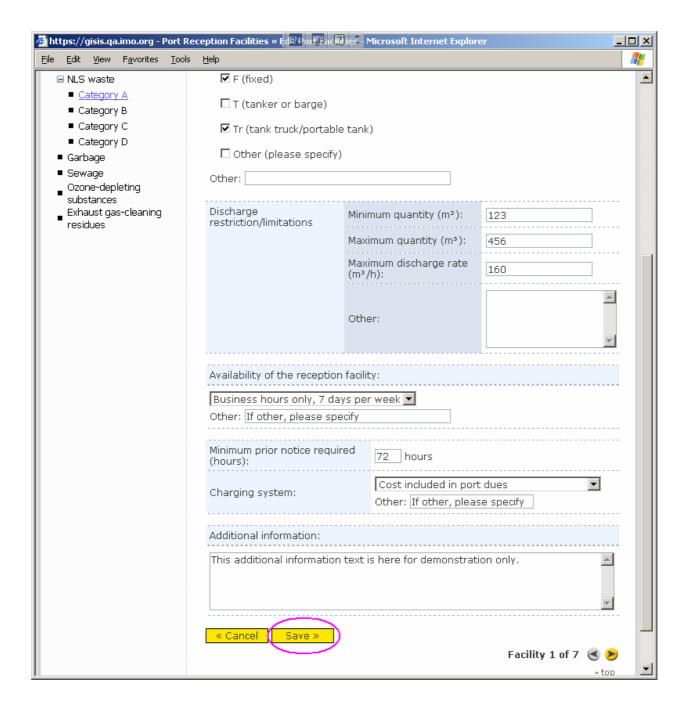

Select a waste category from the menu on the left to see reception facilities for that category. Use the paging buttons to scroll through multiple facilities for one waste category:

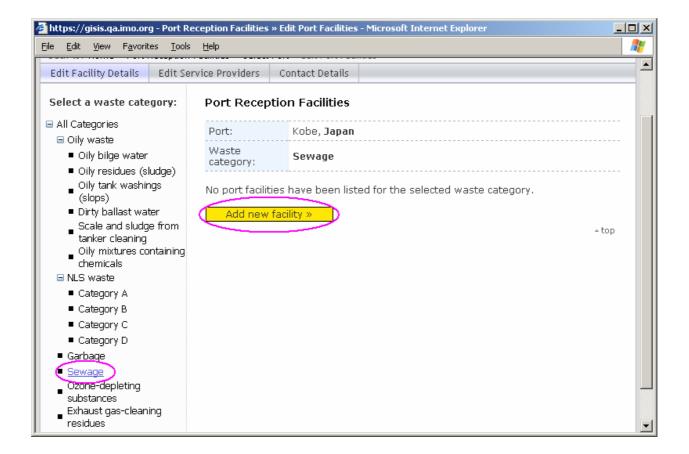

To edit the details of a facility, click on the **Edit** button. Click **Delete** to delete the waste facility entry.

Once details have been updated, click the **Save** button at the bottom of the page. Click **Cancel** to abandon your changes.

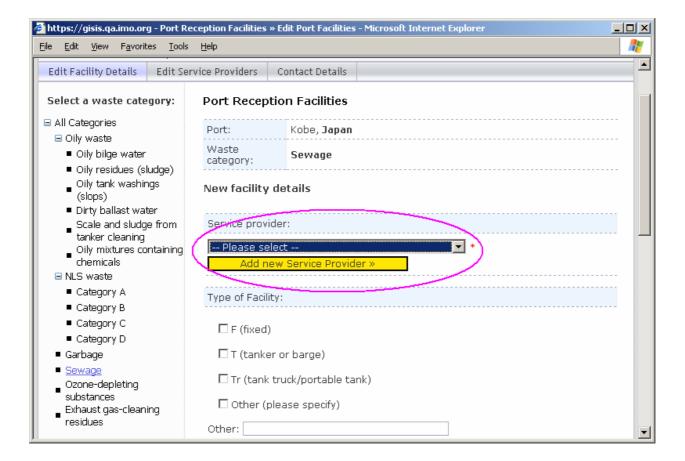

Populating the PRF module with new data

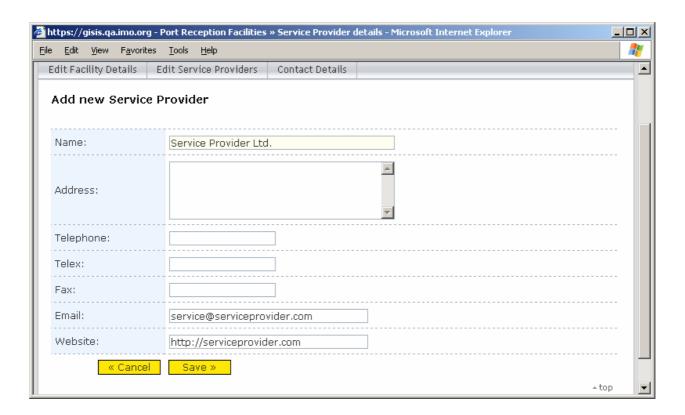

To enter details of new port reception facilities in the database, follow the instructions in the previous section to **Edit facility details** of a port, and select the relevant waste category from the left. Then click **Add new facility**:

When adding a new facility, a Service Provider must be specified. Choose a previously-entered Service Provider from the list. To enter a new Service Provider, click on **Add new Service Provider**:

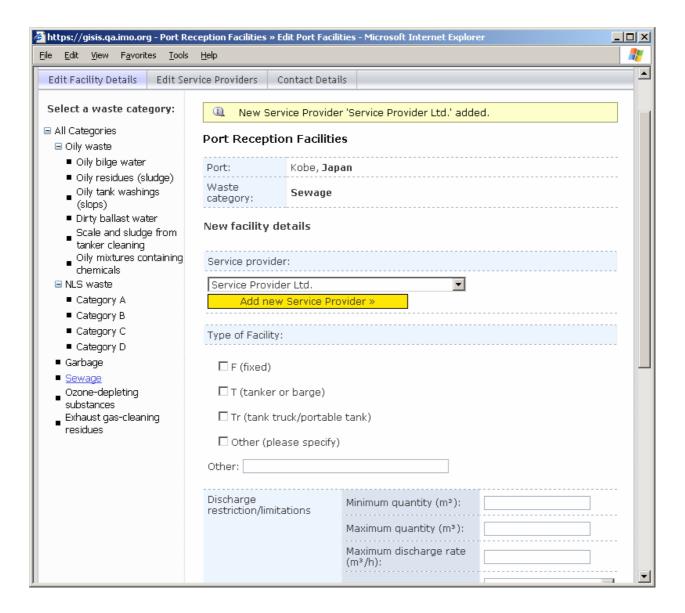

If the required Service Provider is not on the list, click on **Add** and enter the details of the new provider:

Click Save to add the new Service Provider.

You will then be brought back to the page to enter details of the new port facility. Notice that the newly added Service Provider is now selected in the list.

Once you have finished adding details of the new port reception facility, click **Save** at the bottom of the page to insert the new facility into the database:

Updating contact details of national Authorities

To update the details of the contact point in the Administration of the flag State and Authorities of the port State, select **Contact details** from the top menu.

When contact details have been updated, click on the Update button to save your changes.
