

The Copenhagen Centre on Energy Efficiency is part of UNEP-CCC and aims to support action towards doubling the global rate of improvement in energy efficiency by 2030.

Untapped opportunities in Energy Efficiency to decarbonize ports and shipping:

Policy and regulation

- NDCs 3.0
- Secondary Legislation
- Reporting
- Transparency

Implementation

- “Low-hanging Fruits”
- Finance
- Capacity Building
- Awareness

Value chain decarbonization

- Digitalisation
- New Fuels
- Sector Coupling
- Competitiveness
