A manifestation of commitment by policy makers, associations and industry partners

- Key challenges
 - sheer number of seafarers in need of enhanced training
 - IMO to determine the transition mechanism
- Led the identification of the Competencies & Training candidate needs
- Delivered 12 hybrid workshops / 116 participants / over 500 recommendations in total
- Facilitate the creation of training materials and instructors' handbooks
- Next Steps to 'safely' consider
 - Regulatory frameworks update
 - Provision of targeted education on fuel-specific properties and risk profiles
 - Enhanced Safety Measures and Equipment
