

TECHNICAL COOPERATION COMMITTEE
69th session
Agenda item 3(a)

TC 69/3(a)
18 April 2019
Original: ENGLISH

INTEGRATED TECHNICAL COOPERATION PROGRAMME

(a) Annual Report for 2018

Note by the Secretariat

SUMMARY

Executive summary: This document provides annex 1 of the annual report on the technical cooperation activities implemented under the Integrated Technical Cooperation Programme during 2018

*Strategic direction,
if applicable:* 1 and 7

Output: 1.1, 1.6, 1.9, 1.10, 7.3, 7.4, 7.7

Action to be taken: Paragraph 4

Related documents: TC 67/3(b)/Rev.1 and TC 67/4(a)

1 In accordance with the reporting requirements approved by the Committee (TCC), at its sixty-second session in June 2012, the Secretariat submits an annual report on the Organization's Integrated Technical Cooperation Programme (ITCP). Thus, this ITCP Annual Report for 2018 records the results of implementation in 2018, the first year of the 2018-2019 biennium.

2 The ITCP annual report is structured as two annexes which distinguish between the implementation results in the field and the financial delivery outcomes. The complete ITCP Annual Report for 2018, therefore, comprises the two segments under the annexes listed below:

- .1 annex 1 – a summary of the achievements for the year, including details on the individual activity outputs; and
- .2 annex 2 – an overview of the financial resource delivery, with statistics, delivery trends, a profile of resource contributions, resource and expenditure data, illustrated with comparative disbursement by region and maritime discipline.

3 The preparation of annex 2 is dependent on the receipt of the audited financial figures which provide the baseline data for ITCP expenditure analyses. For that reason, annex 2 is submitted independently under document TC 69/3(a)/Add.1.

Action requested of the Committee

4 The Committee is invited to note the attached ITCP Annual Report for 2018 and make such comments and decisions as it deems appropriate, which will be taken into account in the further development of ITCP.

ANNEX 1

INTEGRATED TECHNICAL COOPERATION PROGRAMME

Annual Report for 2018

GLOSSARY	
APPENDIX – ITCP activities 2018	

INTRODUCTION

1 The Integrated Technical Cooperation Programme (ITCP) is designed to assist developing countries¹ to implement international maritime rules and standards in a harmonized manner in accordance with IMO's global mandate "to promote safe, secure, environmentally sound, efficient and sustainable shipping through cooperation". Thus, ITCP, underpinned by the technical cooperation mission objectives, is developed in response to the technical assistance needs of Member States while, at the same time, methodical planning ensures the relevance, transparency, effectiveness and efficiency of the technical assistance provided. Through implementation of ITCP, IMO addresses the objectives of strengthening regional maritime competencies and promoting maritime development across the globe.

2 The ITCP structure is an integrated framework of regional and global programmes, which is planned and presented to the Technical Cooperation Committee (TCC) for approval each biennium. The annual programmes, encompassing their fully developed constituent activities, are finalized through Programme Implementation Documents (PIDs) and are ready for delivery at the beginning of each calendar year.

3 In accordance with the revised reporting requirements,² approved by TCC at its sixty-second session in June 2012, this report is a stand-alone annual report on ITCP implementation in 2018

4 The results of ITCP delivered in 2018 represent the collective effort of some 40 implementing officers and their supporting staff. Among the implementing officers are IMO staff at the Headquarters in London and in the Regional Presence Offices together with external partners and regional organizations.

5 While this report provides particulars of the activities delivered under ITCP, further operational details on specific elements of technical cooperation are submitted to TCC for consideration under separate agenda items. Where relevant, reference to such documents is made throughout the text of this report.

6 This report illustrates the annual results for 2018 from both financial and non-quantifiable perspectives, so as to provide a full and transparent representation of the outputs delivered. In accordance with past practice, the complete report comprises two separate segments under the annexes listed below:

- .1 annex 1 – a synopsis of ITCP achievements in 2018, with summaries and statistics of the activities delivered, including an appendix detailing the individual activity results of regional and global programmes; and
- .2 annex 2 – an overview of the financial resource delivery supported by a statistical analysis which displays long-term delivery trends, a profile of resource contributions to capture the donor³ resources expended, resource and expenditure data illustrated with comparative disbursement by region and maritime discipline. The appendix to annex 2 provides a list of respective expenditure on each of the constituent programmes in operation in 2018.

¹ The designations "developing countries" and "developing regions" are intended for statistical convenience and do not express a judgement about the stage reached by a particular country or area in the development process.

² The *Revised Rules of Operation of the Technical Cooperation Fund*, TC.1/Circ.67.

³ It may be noted that, for the purposes of budgeting and implementation of TC activities, the TC Fund is considered a "donor entity" within the TC programme management framework.

7 In the interests of clarity, the information in this report addresses expenditure on technical cooperation activities only; full financial information is available in Council document C 122/4(b) – Financial report and audited financial statements for the financial period ended 31 December 2018.

PROGRAMME OVERVIEW AND EXECUTION

Overview of ITCP delivery in 2018

8 ITCP activities delivered in 2018 covered a wide range of subject matters under the maritime disciplines of safety, security, facilitation, legislation, marine environment protection, Member State audit, maritime training and general maritime sector.

9 In the development and implementation of ITCP activities, consideration was given to the respective objectives of the approved strategic directions and outputs of the *Strategic Plan for the Organization for the six-year period 2018 to 2023* (A.1110(30)), as well as the Secretary-General's vision and policy directions on technical cooperation matters. Moreover, due regard was given to the United Nations (UN) 2030 Agenda for Sustainable Development (2030 Agenda), regional and subregional strategies and the findings of the IMO Member State Audit Scheme (IMSAS) audits. In this respect, particular emphasis was placed on strengthening institutional capacities and human resource development in the regions.

10 To supplement the regional programmes, the global programmes focused on specific technical and emerging issues undertaken from a global perspective. This flexible structure of ITCP provided a mechanism for funds to be targeted across a spectrum of subject matters. Developing countries gain from the symbiosis of regional and global programmes, which allows activities to be delivered to those countries which need them most, and also impacts positively on the sustainable development of the maritime community as a whole.

11 The value of the continued development of formal partnerships to promote ITCP is plainly apparent, and IMO's ability to deliver technical assistance was clearly enhanced through the formal partnership agreements that the Organization has reached with many of its Member States and various international and regional organizations (TC 69/4(c)).

12 IMO's technical cooperation mandate was served in a comprehensive manner through the implementation of the activities of ITCP during 2018. A summary of all deliverables carried out under the programmes is presented in the tables and charts at the end of each regional and the global overview. Further details on the activities implemented, including the outputs and participating countries, are presented in the appendix.

Aggregates for 2018

13 In 2018, 196 activities were delivered out of a total of 252 activities programmed, a delivery rate of 78%. This is slightly fewer activities delivered than in 2017, when 215 activities were delivered out of 258 programmed, for a delivery rate of 83%. However, an additional 24 activities were ongoing at the end of 2018, which, when added to those completed during the year, bring the total delivery to 220 out of 252, or 87%. Of the activities delivered in 2018, 13 were advisory and needs assessment missions, which is an increase from the 9 such activities delivered in 2017; while 123 were national and regional training courses, an increase from the 119 courses held in 2017. Other activities including model legislation, review and updating of training packages, meetings of heads of maritime administrations, conferences and other specific aspects of technical assistance remained generally consistent in 2018, with 84 such events delivered, as compared to 87 similar activities carried out during 2017.

14 Although IMO endeavours to deliver all activities programmed in a given year, it is inevitable that circumstances arise which necessitate the cancellation or postponement of activities. This can be a request from a host country, or can be due to security concerns, political situation, weather event or epidemic. For this reason, delivery of programmed activities never reaches 100% in any given year.

15 IMO sponsored a total of 76 fellowships in the maritime field in 2018, 12 more than the 64 fellows recorded in 2017. This increase was due to funds becoming available from activities that were postponed or cancelled, which allowed IMO to provide five additional fellowships each to the World Maritime University (WMU) and the IMO International Law Institute (IMLI), making a total of 36 fellows who qualified through the two IMO global maritime training institutions. Additionally, approximately 3,198⁴ persons worldwide were trained through attendance at national and regional training workshops and seminars, a small decrease from the 3,522 trained in 2017.

16 A further 561 senior officials attended events in 2018 aimed at developing and harmonizing regional strategies on maritime technical issues, a small increase from the 551 recorded in 2017. This figure is in addition to the number of persons trained through the regular training courses listed above.

17 Table 1 and chart 1 below display ITCP aggregates summarizing the categories of activities and trainees. It should be noted that in all charts to follow, trainee numbers do not include the number of fellowships completed.

Table 1 – Summary of ITCP aggregates, 2018

Activities	2018
Advisory/assessment missions	13
National training events	62
Regional training events	61
Other activities	84
Trainees/Fellows	
Trainees in IMO-sponsored training events	3,198
Fellows (funded by IMO, in IMO global maritime training institutions)	36
Other fellows	40
Other	
Strategy Officials	561

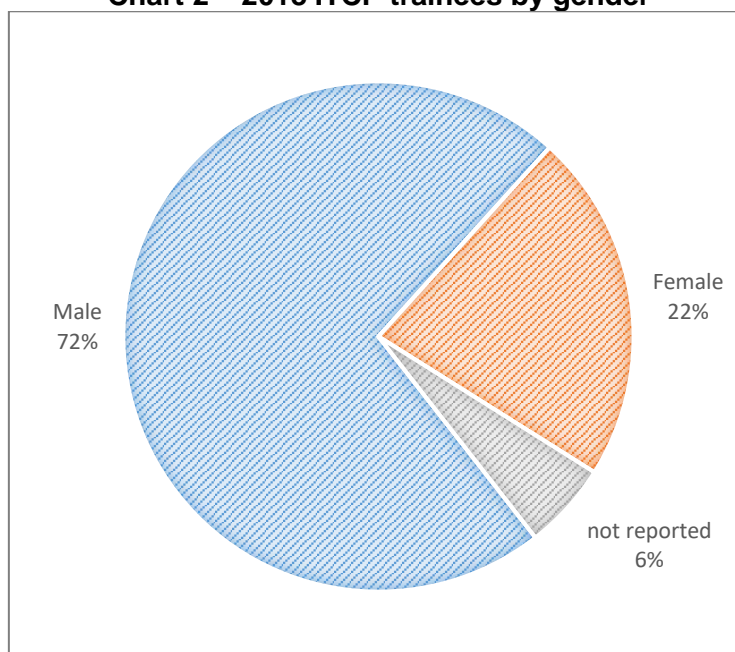

⁴ Please note these figures are indicative, and a number of officials may have attended two or more of the training workshops and seminars which took place on various issues.

Chart 1 – ITCP total activities and trainees, 2018

18 The IMO Women in Maritime programme has, for the past three decades, promoted opportunities for women in the maritime sector. Document TC 69/10 reports in more detail on this programme, but in an effort to mainstream gender equality, gender statistics are now also included in the Annual Report on ITCP delivery. In this regard, participants at IMO-sponsored trainings and workshops are now asked to include their gender when they register for a training, with the options of "male", "female" and "not reported". This enables the Organization to compile data related to gender and, over time, to build up a picture of the trends of participation by gender within IMO's technical cooperation work. Chart 2 below depicts trainees by gender during 2018.

Chart 2 – 2018 ITCP trainees by gender

Regional overviews for 2018

Africa: regional overview 2018

19 The roles of the three Regional Presence Offices in Africa located in Abidjan, Côte d'Ivoire; Accra, Ghana and Nairobi, Kenya, have continued to be crucial in the Organization's capacity to deliver ITCP. Furthermore, the Regional Presence Offices support and contribute to the long-term goal of strengthening institutional and human capacities in Africa for the effective administration and oversight of the continent's maritime/port sector and for compliance with relevant IMO instruments and quality standards.

20 IMO, in collaboration with the United Nations Assistance Mission in Somalia (UNSOM), implemented a number of activities in support of maritime governance in Somalia. In August 2018, a national workshop for senior maritime officials from the Federal Government of Somalia and the Federal Member States, including members of the country's parliament, was held in Kigali, Rwanda, to discuss the establishment and structure of an effective and functional Department of Maritime Administration within the Ministry of Ports and Maritime Transport. It is noteworthy that, following the implementation of these activities, the Federal Government of Somalia has now established the Somalia Maritime Administration.

21 During the period under review, the Global Search and Rescue (SAR) Plan continued to receive support through collaboration with the International Maritime Rescue Federation (IMRF). Three regional meetings of the Coordinating Committees of the Maritime Rescue Coordination Centres (MRCCs) in southern and northern Africa were held. The meetings aimed at improving regional SAR coordination and the development of national SAR plans. Furthermore, IMO delivered two regional SAR coordination training courses in southern Africa. Training courses on GMDSS and SAR operations organization and management, were also delivered. The Africa region benefited from a range of activities which included ISM Code, domestic ferry safety and facilitation of maritime traffic. Other activities included support to gender equality and the integration of women in the maritime sector. IMO has continued to give consideration to the special shipping needs of Small Island Developing States (SIDS) and Least Developed Countries (LDCs) in Africa.

22 Workshops and training activities on marine environmental sustainability were carried out in the region to increase awareness on the Biofouling guidelines and on ratification, implementation and enforcement of the AFS Convention; the development of oil spill contingency plans; MARPOL Annexes I-V, and the London Protocol. In the spirit of partnership development, IMO and IPIECA, under the GI WACAF initiative, continued to strengthen the national oil spill response capacity and capabilities of countries in west, central and southern Africa.

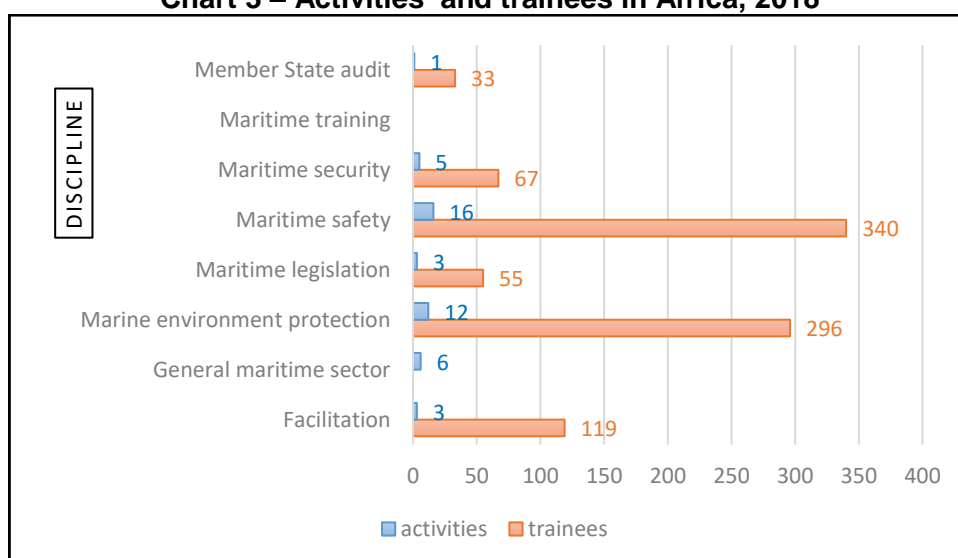

23 IMO participated at the nineteenth session of the Regional Coordination Mechanism for Africa (RCM Africa) and also participated in and facilitated the fourth Conference of the Association of African Maritime Administrations (AAMA), held in Sharm El Sheikh, Egypt, with the theme "Protecting the African marine environment to support sustainable development". The theme was chosen against the backdrop of Africa's leading role and support to the United Nations 2030 Agenda and its Sustainable Development Goals (SDGs), the African Union Agenda 2063 and the 2050 Africa's Integrated Maritime Strategy (2050 AIM Strategy).

24 IMO participated in the Ministerial Preparatory Meeting for the Seventh Tokyo International Conference on Africa Development (TICAD), which will be held in Yokohama, Japan, in 2019. Furthermore, IMO participated in the Sustainable Blue Economy Conference in Nairobi, Kenya, in November 2018, during which IMO hosted both a side event and an exhibition.

Arab States and Mediterranean: regional overview 2018

25 IMO, in collaboration with the International Hydrographic Organization (IHO) and the International Association of Marine Aids to Navigation and Lighthouse Authorities (IALA), conducted the first joint needs assessment mission in Sudan on matters related to hydrography, hydrographic surveys, nautical charts, ships' routeing and aids to navigation. The collaboration between the three organizations, which is expected to be sustained, was aimed at enhancing and supporting safety of navigation.

26 Other activities in the region, in 2018, included a regional training course for instructors in accordance with IMO Model Course 6.09 in Egypt, technical assistance for the development of an overall national maritime strategy for Oman, and several additional activities, some in collaboration with the Regional Marine Pollution Emergency Response

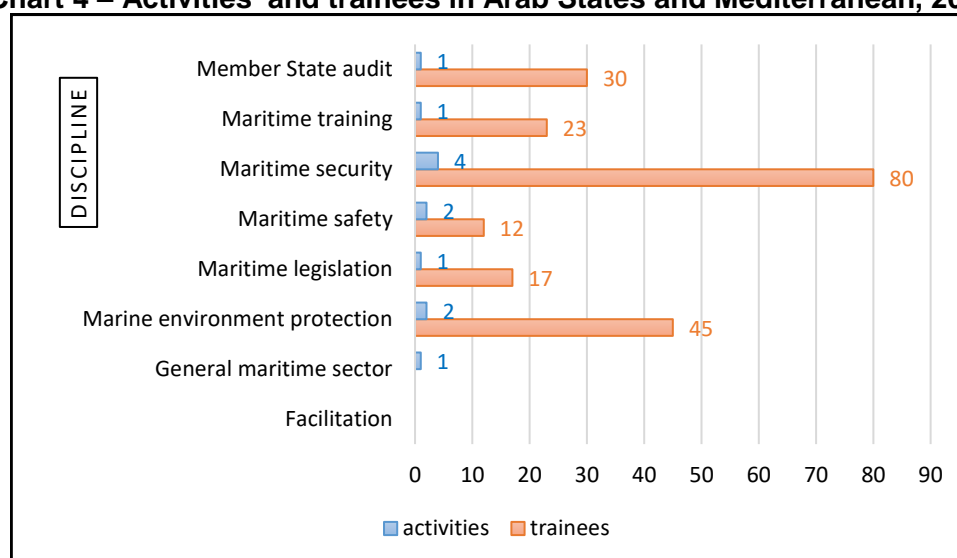

* These figures include all activities delivered by each discipline, including training activities, needs assessment/advisory missions and other types of activities.

Centre for the Mediterranean Sea (REMPEC), on matters related to MARPOL Annexes V and VI, response to oil spill incidents involving HNS, illegal disposal of garbage and marine plastic litter, and OPRC Level 3.

Asia and Pacific Islands: regional overview 2018

27 Capacity-building activities in the region concentrated on strengthening the national maritime administrations. The resources for technical assistance were supported through various partnership arrangements with Australia, Malaysia, Singapore, the Pacific Community (SPC) and the Secretariat of the Pacific Regional Environment Programme (SPREP), among others. The Organization's technical assistance was also supported with financial contributions from donors, including Belgium, China, Malaysia and the Republic of Korea. Furthermore, the support provided through the IMO Regional Presence Office for East Asia, which is located in Manila, the Philippines, also continued to play its important role to deliver ITCP activities in East Asia with in-kind contribution received from the Philippines. 2018 marked the establishment of the position of an IMO Technical Cooperation (TC) Officer in the Pacific as a result of the Committee's decision to expand the regional presence for technical cooperation to the Pacific Islands region. The services of the TC Officer were utilized by SPC and SPREP to support the delivery of IMO's technical assistance programme within the framework of the existing partnership arrangements with the two regional organizations.

* These figures include all activities delivered by each discipline, including training activities, needs assessment/advisory missions and other types of activities.

28 Regional meetings, such as the Asia-Pacific Heads of Maritime Safety Agencies (APHoMSA) Forum and the Association of South East Asian Nations Maritime Transport Working Group (ASEAN MTWG), provided the opportunity to identify the real needs of Member States with their direct input.

29 The Asia region benefited from a range of workshops, seminars and training courses, particularly in the areas of search and rescue, ISM Code, Cape Town Agreement, domestic ferry safety, MARPOL Annex V, including port reception facilities, MARPOL Annex VI, OPRC and oil spill contingency planning, Hong Kong Convention, PSSA and the implementation of conventions focusing on legal aspects.

30 The region was also a beneficiary of the Marine Environment Protection for Southeast Asian Seas (MEPSEAS) project, being funded (\$2 million) by the Norwegian Agency for Development Cooperation (Norad). This is a follow-up project to the IMO-Norad foundation project delivered during 2012-2017 that provided assistance to six east Asian countries in ratifying and implementing IMO instruments for the protection of the marine environment. During 2018, the project made significant progress in achieving the targets set for the year, including identifying national lead agencies, developing national work plans, forming national task forces, recruitment of national and international consultants, identifying the strategic project partners, including ASEAN-MTWG, PEMSEA and Tokyo MoU Secretariat and holding the first high-level regional meeting of the project in Indonesia.

31 The Pacific Islands region also benefited from a variety of activities in support of SPC's maritime transportation programme and SPREP's Pacific Ocean Pollution Prevention Programme (PACPOL) Strategy for 2015-2020. Activities included those related to marine casualty investigation, ISM Code, port State control, domestic ferry safety, facilitation of maritime traffic and capacity-building of the maritime administrations. Moreover, capacity-building activities to enhance the capacities of the Solomon Islands Maritime Safety Administration (SIMSA) were also implemented thanks to funds provided by Belgium.

Western Asia and Eastern Europe: regional overview 2018

32 Overall the majority of technical assistance provided through the regional programme in support to maritime development focused on the outcome of the IMSAS audits and was tailored to the real needs of the recipients. Building institutional capacity continued through regional events related to the IMO Liability and Compensation Conventions, BWM and OPRC Conventions and national advisory missions related to the implementation and enforcement of IMO instruments, including the transposition of these instruments into national legislation.

* These figures include all activities delivered by each discipline, including training activities, needs assessment/advisory missions and other types of activities.

Latin America and Caribbean: regional overview 2018

33 ITCP activities for the region continued to be delivered effectively during 2018 with the support of IMO regional partners: COCATRAM, SECROGRAM and RAC/REMPEITC-Caribe. Further support was provided through the partnership arrangements set out under the respective Memoranda of Understanding (MoUs) with Argentina, Chile and Mexico.

34 The partnership arrangements not only made a notable impact on the effective implementation of ITCP activities but also contributed to the harmonized approach of the region and reduced the costs of implementing activities. The IMO Regional Maritime Adviser for the Caribbean also facilitated and promoted the implementation of a number of activities in the Caribbean region.

35 Marine environment protection and maritime safety training objectives in 2018 covered a range of subjects with activities delivered on OPRC-HNS, AFS and Biofouling, BWM, MARPOL, PSC, CSC Convention and STCW, among others.

* These figures include all activities delivered by each discipline, including training activities, needs assessment/advisory missions and other types of activities.

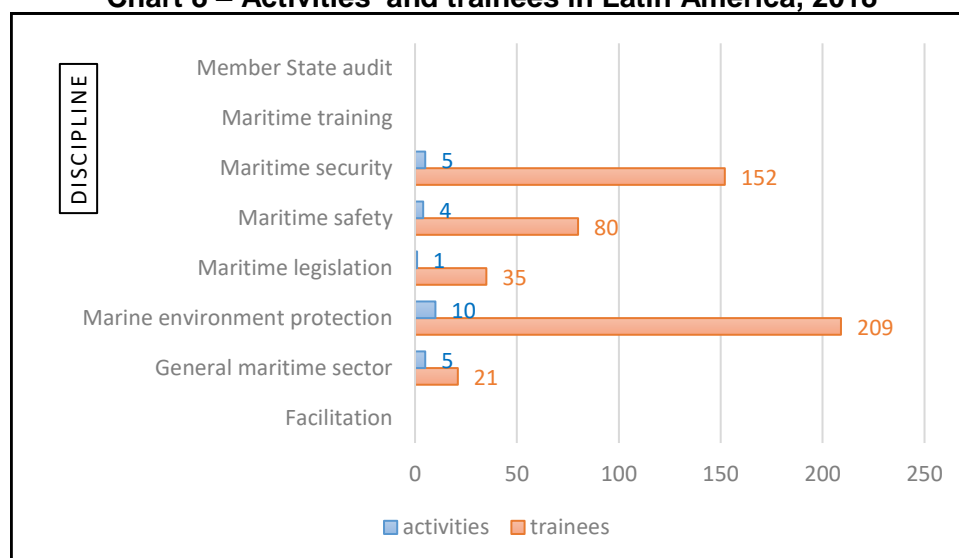

36 In addition, IMO delivered the first phase of the Ship Inspector Training Course (CASIT), which was held in Port of Spain, Trinidad and Tobago, during October and November 2018. Approximately forty participants from the Caribbean region participated in this three-week training course, which primarily focused on the regional Codes of Safety for Small Commercial Vessels (SCV) Code and the Code of Safety for Caribbean Cargo Ships (CCSS Code).

37 Furthermore, a regional meeting on the United Nations 2030 Agenda was held in Viña del Mar, Chile, in October 2018. This meeting covered the basic concepts of the United Nations Development Assistance Framework (UNDAF) system and provided the opportunity to share experiences and tools developed by the United Nations Development Group (UNDG) with a view to assisting maritime administrations to work on the future incorporation of maritime issues in the UNDAF processes. Further to this regional meeting, the Maritime Authority of Colombia announced at the XIX meeting of the Regional Network on Cooperation among Maritime Authorities (ROCRAM) in Latin America, held in Veracruz, Mexico, in December 2018, that Colombia was in the process of including a maritime project in the country's UNDAF process for 2020-2024. It is expected that similar regional meetings on the United Nations 2030 Agenda will be replicated in other geographical areas, including Africa and Asia and Pacific, in the future.

Global programme overviews 2018

38 The **Technical advisory services** programme, through its flexible funding mechanism, aims at responding to marine emergency requests and demands for assistance by governments. In 2018, the programme funded the consultative mission on the progress of the casualty investigation into the **CF Crystal** and **Sanchi** incident and IMO's participation in the regional workshop on maritime governance, the Pacific MoU steering committee meeting and the regional transport forum in the Pacific region.

39 The programme on **Support to Small Island Developing States (SIDS) and Least Developed Countries (LDCs) for their special shipping needs** continued to support the sustainable development of these unique and particularly vulnerable Member States. In 2018, this took the form of sponsoring the participation of a number of SIDS and LDCs at the Nineteenth Session of the APHoMSA Forum.

40 The programme **SDG 5: Strengthening the maritime sector** remained the Organization's primary vehicle for articulating the United Nations system-wide commitment to gender equality and gender mainstreaming, in support of SDG 5 to achieve gender equality and empower all women and girls under the slogan "Training-Visibility-Recognition". The programme has strengthened national and regional capacities through an increased number of gender-specific fellowships for reinforcing access to high-level technical training opportunities for women in developing countries and enhanced career development for women in maritime administrations, ports and maritime training institutes (TC 69/10). During 2018, the programme was able to provide an increased number of fellowships to women due to additional funding from regional programmes. The programme supported the ninth regional conference of the Association for Women in the Maritime Sector in Eastern and Southern Africa region (WOMESA), the second regional conference for the Women in Maritime Association, Caribbean (WiMAC) and a side event organized by WOMESA, held within the margins of the Nairobi Global Sustainable Blue Economy conference.

* These figures include all activities delivered by each discipline, including training activities, needs assessment/advisory missions and other types of activities.

41 The **Capacity-Building and Training** programme focused on human resource development through high-level training of maritime specialists at WMU and IMLI, including fellowships for students from SIDS and LDCs, as well as other Member States (TC 69/11(a) and TC 69/11(b)) and the provision of fellowships for short and medium-term courses at IMSSEA and IPER (TC 69/11(c)). It also funded national maritime transport policy-related activities, including the delivery of four national workshops in Kenya, Mexico, Myanmar and the Philippines, as well as the production of two related promotional videos. In addition, the programme supported, inter alia, the workshop on general principles of drafting national legislation to implement IMO Conventions held at IMO Headquarters; the ongoing revision and redesign of the Country Maritime Profile module and the development of a maritime single window for Antigua and Barbuda.

42 The programme on **Partnerships and Emerging Issues** is dedicated to increasing the volume of funds for ITCP, diversifying the donor composition of its resource base and forging new partnerships for cost-sharing arrangements (TC 69/4(c)). Achievements included strengthening existing partnerships and continuing the development of new regional agreements for the decentralized implementation of ITCP; delivery of the first donor-recipient workshop, which raised awareness of IMO's resource mobilization strategy and established networks to develop knowledge partnership mechanisms for the development of cooperation activities in the maritime field; IMO participation in Global Environment Facility (GEF) meetings on emerging environmental issues; the participation of developing countries in the International Oil Spill Conference 2018; participation at the RAC/REMPEITC-Caribe Steering Committee to discuss the new institutional arrangements of the Center and the work programme for the coming biennium; and a number of port State control training activities. The programme included a social media campaign to promote the Day of the Seafarer under the theme "Seafarers' Wellbeing", which aimed to bring global attention to the issues affecting the work and lives of seafarers, and particularly their mental health.

43 IMO's global **Enhancement of Maritime Security** programme supports countries in enhancing security measures to protect ships and ports from threats posed by terrorism; piracy and armed robbery; smuggling of arms, drugs, and illicit goods; and other illicit activities. The programme, being funded consistently by the United States (\$4.2 million over the last 10 years, \$325,000 of which was provided in 2018) as well as by recent single contributions from Oman, Qatar and the United Kingdom, is based on Conference Resolution 5 of the SOLAS Diplomatic Conference held in London, in 2002, to adopt SOLAS chapter XI-2 and the ISPS Code (the special measures to enhance maritime security). In 2018, 10 national meetings and 5 regional events were organized and/or co-organized with development partners for the Designated Authority, port and ship security officials, managers and other related personnel, especially designed to review and enhance the implementation of effective maritime security measures, including training on ISPS Code requirements, national maritime security legislation, self-assessment and drills and exercises.

44 In addition, the programme continued to deliver assistance in response to requests of SOLAS Contracting Governments, and a new \$1 million project, funded by Japan and implemented in partnership with the United Nations Office on Drugs and Crime (UNODC), on strengthened implementation of international instruments related to countering maritime terrorism in seven Asian Member States was initiated. The project included both, national workshops and a subregional seminar targeting officials of Designated Authorities of all seven countries, as well as legal experts with the involvement of the United N Security Council Committee on Resolution 1540 related to the proliferation of weapons of mass destruction.

45 Ongoing threats to the shipping and port sectors continue to evolve and appropriate security measures, therefore, need a multi-agency response. Additional table-top exercises were organized in an effort to enhance inter-agency collaboration on maritime security issues, particularly incident planning and response and promoting a whole-of-Government approach to maritime and port security.

46 Through the global programme on the **IMO Member State Audit Scheme (IMSAS)**, the Organization continued to provide assistance according to section 9 of resolution A.1067(28). In 2018, technical assistance became part of the IMSAS process by facilitating the preparation of the audit and the identification of obstacles to completing the audit. Two regional and two national IMSAS-related activities were successfully delivered in 2018.

47 The programme on the **Effective Implementation and Enforcement of Energy Efficiency Measures for Ships** delivered eight national and one regional workshops on the prevention and control of shipping and port air emissions, which trained maritime and port administrations personnel on how to conduct port emissions assessments and inventories and develop strategies to address emissions in the port area. The programme developed and delivered a new training package on the IMO data collection system for fuel oil consumption, with a view to training maritime administrations on the provisions of regulation 22A of MARPOL Annex VI, which entered into force in 2018.

48 The **IMO Model Courses** programme provides a framework tool for managing the production, translation, editing and printing of model courses. In 2018, three new model courses were published: *Use of Leadership and Managerial Skills* (T140E), *Crowd Management Training* (T141E) and *Safety Training for Personnel Providing Direct Service to Passengers in Passenger Space* (T144E). The revised model course on *Security Awareness Training for Port Facility Personnel with Designated Security Duties* (TA324E) was also issued.

49 The programme on the **Promotion of the London Protocol (LP)** contained the technical cooperation assistance to developing countries related to the LP, and extended to prospective LP parties. The activities targeted accession to and implementation of the LP, as well as the identification and removal of barriers for countries to achieve compliance with ocean disposal agreements as crucial part of marine pollution management. During 2018, national workshops in the Philippines and Sri Lanka, a subregional workshop in Chile and a joint LC/LP-OSPAR/Abidjan Convention regional workshop in Accra provided a comprehensive overview of the legal, technical and scientific tools required in the preparation for and accession to the LP, and the successful implementation of this instrument. It is worth noting that under this programme, following several targeted interventions in the Latin America and Caribbean region over the last five years, three Member States from the region deposited their instruments of ratification in recent months, and five out of the ten latest ratifications of the London Protocol were from Latin America or the Caribbean. This is a clear illustration of the impacts of the technical cooperation efforts, and shows good progress towards one of the key indicators in the LP/LC Strategic Plan, namely to "substantially increase the rate per year of new ratifications or accessions to the London Protocol."

50 The programme for **Support to WMU and IMLI** funded expenses related to lecturing by IMO staff members and the institutions' governance. In 2018, this covered the travel costs of 17 staff members who lectured at WMU and IMLI. In addition, the programme facilitated the provision of funds from the Government of the United Kingdom to cover the visa fees of IMLI and WMU students visiting IMO Headquarters.

51 The Implementation of the **Djibouti Code of Conduct** programme continued to deliver capacity to counter piracy and other illicit activities that threaten safety and security of navigation in the West Indian Ocean and the Gulf of Aden. Following the adoption of the Jeddah Amendment in 2017, the focus in 2018 shifted to laying the groundwork for developing capability, legal frameworks and inter-agency cooperation nationally, as the foundation for stronger regional cooperation. Activities in 2018 included implementation of 11 training courses and workshops, as well as delivery of equipment projects in Kenya and Seychelles to enhance maritime domain awareness. IMO also provided support to the Djibouti Regional Training Centre (DRTC) to help it to achieve its mandate. DRTC hosted seven training events during 2018, four on behalf of IMO.

52 The **West and Central Africa Maritime Security** programme delivered capacity-building activities focusing on providing direct assistance to Member States in the region with a view to developing and enhancing their capacity to address issues and challenges in their maritime domains. This included assistance on development of national maritime strategies and national maritime security strategies through the creation of national maritime security committees, and adoption of national maritime security implementation plans and procedures. The programme also focused on assistance for the implementation of SOLAS chapter XI-2, the ISPS Code and IMO maritime security measures, through the organization of national workshops for Designated Authority, port security officials, managers and related personnel. A series of assessments and training on port security in different ports in the region, entitled Regional programme to encourage effective self-auditing of security in ports, was delivered, focusing on enabling the strengthening of maritime and port security-related requirements to which SOLAS Contracting Governments and port authorities must adhere in order to meet their obligations under the current international maritime framework and to develop their capacities to enforce the requirements. The programme continued to encourage dialogue with other United Nations agencies and relevant stakeholders to promote a coordinated and consistent response to maritime security threats.

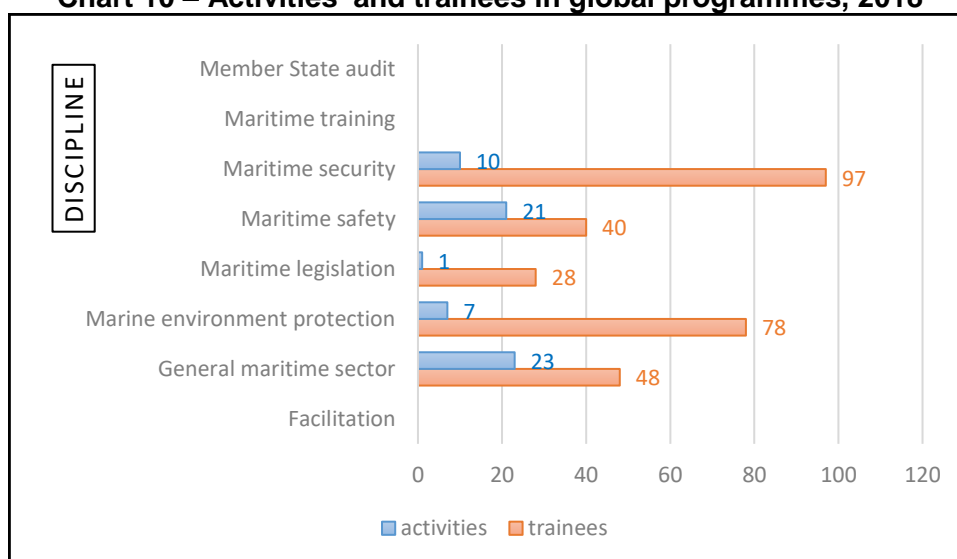

53 The programme on **Support for the response to the 2030 Agenda for Sustainable Development and the Blue Economy** supported IMO's participation in three relevant meetings during 2018 and also provided funds for the production of promotional materials related to IMO's involvement with the SDGs and the Blue Economy.

Table 7 – Summary of deliverables in global activities⁵, 2018

Activities	2018
Advisory/assessment missions	0
National training events	0
Regional training events	15
Other activities	47
Trainees/Fellows	
Trainees in IMO-sponsored training events	291
Fellows (funded by IMO, in IMO global maritime training institutions)	n/a
Other fellows	n/a
Other	
Strategy Officials	24

⁵ As far as possible, the participants of activities under the global programmes have been disaggregated into the beneficiary regions and have thus been included under the regional tables in the preceding paragraphs. In the case where participation in an activity comprised participants from more than one region, these activities have been categorized under the global category. This includes the recipients of fellowships, which are represented in the regional overviews and thus do not appear in table 7.

Chart 10 – Activities* and trainees in global programmes, 2018

Summary of all programmes

54 The activities delivered under all ITCP regional and global programmes during 2018 are summarized in table 8 below. It should be noted that in an effort to more accurately reflect the beneficiary countries, participants of activities under the global programmes have been disaggregated into the beneficiary regions, whenever possible, and have thus been included under the regional statistics. In the case where participation in an activity comprised participants from more than one region, these participants have been categorized under the global category.

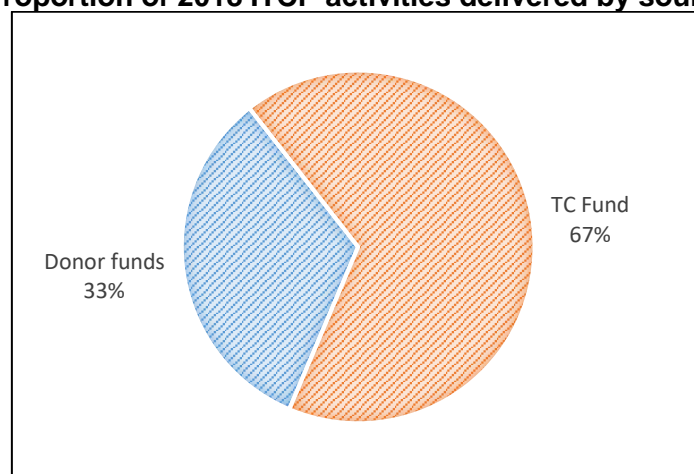

* These figures include all activities delivered by each discipline, including trainings, needs assessment/advisory missions and other types of activities.

Table 8: Summary of deliverables in all regional and global programmes, 2018

Activities	Africa	Arab States / Med	Asia	Pacific Islands	W/EE	Latin America	Caribbean	Global	Total

Strategy Officials	279	0	57	47	0	72	82	24	561

55 As will be detailed further in the addendum to this document, the activities under ITCP are financed through a combination of TC Fund and donor funding. The table showing the full list of activities programmed in 2018 is shown in the appendix. In the appendix table, there is a column for TC Fund, indicating whether the activity was financed in part or in full by the TC Fund (column marked "Yes") or whether it was fully funded by donors (column marked "No"). Where a cell is left blank, the activity was postponed or cancelled. Chart 11, below, shows the proportion of activities delivered which were financed in part or in full by the TC Fund and those which were fully donor funded.

Chart 11 – Proportion of 2018 ITCP activities delivered by source of funding

Long-term marine environment projects

56 In addition to the regional and global programmes under ITCP, IMO's technical assistance work includes a number of larger marine environment projects which operate under a multi-year structure to deliver targeted results.

57 The **Capacity Building for Climate Mitigation in the Maritime Shipping Industry via the network of Regional Maritime Technology Cooperation Centres (MTCCs) – Global MTCC Network (GMN)** project is funded (€10 million) by the European Union (EU). All five MTCCs have become fully operational in 2018 and have been delivering capacity-building activities in the respective regions as well as undertaking pilot projects related to fuel consumption data collection and low-carbon technologies and practices. The Secretariat is currently in discussion with the EU and other donor communities to identify opportunities to sustain this valuable and strategic global network and institutional framework beyond the current project time frame (2016-2019) so that GMN could contribute to the implementation of the IMO initial GHG strategy.

58 The **Transforming the Global Maritime Transport Industry towards a Low Carbon Future through Improved Energy Efficiency (GloMEEP)** project, being executed in partnership with the United Nations Development Programme (UNDP), is mainly funded (\$2 million) by the Global Environment Facility (GEF). The overall goal of the project is to strengthen the national capabilities for countries to become party to and effectively implement MARPOL Annex VI. During 2018, the project completed the development of a Ship Emissions Toolkit, a Port Emissions Toolkit, finalized the development of national legal, policy and institutional reform reports and the national ship emissions reduction strategies of all lead countries and assisted in drafting legislation to incorporate MARPOL Annex VI into national law in most of the lead countries. Furthermore, a new training package was developed on the IMO data collection system for fuel oil consumption and the first training workshop on this topic was delivered in China. The project also developed a workshop package on the "Prevention and control of shipping and port air emissions" and this was delivered in all lead countries and also at a regional level in Georgia. The Global Project Task Force meeting of the project was held in China, bringing together all major project stakeholders of the project. The project also continued to collaborate with the industry through its Global Industry Alliance for Low-carbon Shipping (GIA). The GloMEEP project is now extended to December 2019. Considering the strategic importance of this project in supporting the IMO initial GHG strategy, the Secretariat, through UNDP, is discussing a new project concept to the GEF to follow up and scale up the GloMEEP under the new GEF-7 funding cycle.

59 The **Safe and Environmentally Sound Ship-recycling in Bangladesh – Phase II – Capacity Building (SENSREC Phase – II)** project is a follow-up of the SENSREC Phase I project in Bangladesh, with funding (\$1.1 million) from the Norwegian Ministry of Foreign Affairs, which will mainly focus on capacity-building and training. During 2018, the project recruited the national project manager, concluded the project implementation agreements and commissioned the first work package that will assist developing a roadmap for the Government of Bangladesh to accede to the Hong Kong Convention.

60 The **Building Partnerships to Assist Developing Countries to Minimize the Impacts from Aquatic Biofouling (GEF-UNDP-IMO GloFouling Partnerships)** project was initiated based on the requests made by IMO Member States to build capacity in developing countries for implementing the 2011 IMO Biofouling Guidelines. The project (2018-2023) is funded by the GEF with a \$6.98 million grant and with an additional \$41 million in co-financing (mostly in-kind) from all participating countries and stakeholders. During 2018, the Secretariat completed the final arrangements with the GEF and UNDP before starting full-scale implementation of the project in 2019.

In-kind support for the delivery of ITCP

61 An essential element in the successful implementation of ITCP activities is the in-kind support provided by Member States, international and regional organizations and the maritime industry. In-kind support typically takes the form of provision of facilities for the activities delivered. The appendix provides details on the individual ITCP activities delivered in 2018, including their location. Generally, it can be assumed that the national authorities of the country of location have provided the facilities for the activity delivered.

62 In addition to the aforementioned provision of facilities, the following in-kind support contributed significantly to the delivery of the programmes of ITCP during 2018:

Table 9: In-kind support

Provision of:	In-kind support providers:
Resource persons , such as experts and consultants on a no-fee basis, provided by:	Argentina; Australia; Brazil; Chile; China; Ghana; Hong Kong, China; India; Jamaica; Malaysia; New Zealand; Norway; Singapore; South Africa; Turkey; GI-SEA; INTERPOL; IPIECA; ITOPF; P & I Clubs; Pew Charitable Trust; REMPEC; SPC; UNODC
Logistical arrangements, administrative support and co-organization , provided by:	Albania; Argentina; Barbados; Belarus; Benin; Cabo Verde; Cameroon; Chile; China; Colombia; Congo; Costa Rica; Ecuador; Egypt; Ethiopia; Gabon; Georgia; Germany; Ghana; Guatemala; Honduras; India; Iran (Islamic Republic of); Jamaica; Kenya; Liberia; Madagascar; Malaysia; Mauritania; Mexico; Morocco; Mozambique; Myanmar; Namibia; Nicaragua; Nigeria; Panama; Philippines; Rwanda; Seychelles; Singapore; South Africa; Sri Lanka; Trinidad and Tobago; Tunisia; United Republic of Tanzania; Viet Nam; Pew Charitable Trust; SPC; UNEP
Catering , provided by:	Albania; Angola; Argentina; Barbados; Belarus; Benin; Cameroon; Chile; China; Colombia; Egypt; Ethiopia; Georgia; Ghana; India; Iran (Islamic Republic of); Jamaica; Kenya; Liberia; Malaysia; Mauritania; Mexico; Mozambique; Myanmar; Namibia; Nigeria; Norway; Panama; Papua New Guinea; Philippines; Seychelles; South Africa; Sri Lanka; Sudan; Trinidad and Tobago; Tunisia; Turkey; Viet Nam
Financial assistance and funding for participants , provided by:	Belgium; China; Germany; Norway; Republic of Korea; SPC
Cost-sharing, including travel and accommodation , provided by:	Hong Kong, China; Mauritania; Mexico; Nigeria; Philippines; Singapore; Pew Charitable Trust; SPC
Translation and interpretation services , provided by:	Argentina; Mexico
Additional in-kind support provided by:	Administrative support for the Regional Presence Offices in Côte d'Ivoire, Ghana and Kenya; Office space for the Regional Presence Office in Côte d'Ivoire; Administrative support and office facilities for the Regional Presence Office in the Philippines and the Regional Maritime Adviser in Trinidad and Tobago, and by SPC for the Regional Presence Office in Fiji.

GLOSSARY

2050 AIM Strategy	2050 Africa's Integrated Maritime Strategy
AAMA	Association of African Maritime Administrations
Abidjan Convention	Convention for the Co-operation in the Protection and Development of the Marine and Coastal Environment of the West and Central African Region
AFS	Anti-fouling Systems
AFS Convention	International Convention on the Control of Harmful Anti-fouling Systems on Ships, 2001
AIS	Automatic Identification Systems
APEC	Asia-Pacific Economic Cooperation
APHoMSA	Asia-Pacific Heads of Maritime Safety Agencies
ARPA	Automatic Radar Plotting Aid
ASEAN	Association of Southeast Asian Nations
ASEAN MTWG	Association of South East Asian Nations Maritime Transport Working Group
Biofouling Guidelines	Guidelines for the control and management of ships' biofouling to minimize the transfer of invasive aquatic species
BWM	Ballast Water Management
BWM Convention	International Convention for the Control and Management of Ships' Ballast Water and Sediments, 2004
Cape Town Agreement	Cape Town Agreement of 2012 on the Implementation of the Provisions of the 1993 Protocol relating to the Torremolinos International Convention for the Safety of Fishing Vessels, 1977
CASIT	Caribbean Ship Inspector Training Course
CCSS Code	Code of Safety for Caribbean Cargo Ships
CMP	Country Maritime Profiles
COCATRAM	Comisión Centroamericana de Transporte Marítimo (Central American Commission on Maritime Transport)
CSC Convention	International Convention for Safe Containers
DA	Designated Authority
DCoC	Djibouti Code of Conduct
DRTC	Djibouti Regional Training Centre
ECCAS	Economic Community of Central African States
ECDIS	Electronic Chart Display and Information Systems
ECOWAS	Economic Community of West African States
e-GUCE	Electronic platform for Single Window of Foreign Trade Operations in Cameroon
EU	European Union
FAL Convention	Convention on Facilitation of International Maritime Traffic, 1965, as amended
FGS	Federal Government of Somalia
FSI	Flag State Implementation
GCF	Green Climate Fund
GEF	Global Environment Facility
GHG	Greenhouse Gas
GI China	IMO-IPIECA Global Initiative for China
GI SEA	IMO-IPIECA Global Initiative for South East Asia
GI WACAF	IMO-IPIECA Global Initiative for West, Central and Southern Africa

GIA	Global Industry Alliance
GIMI	Galilee International Management Institute
GloBallast	GEF/UNDP/IMO Global Ballast Water Management Programme
GloFouling Partnerships	Building Partnerships to Assist Developing Countries to Minimize the Impacts from Aquatic Biofouling (GEF/UNDP/IMO project)
GloMEEP	Global Maritime Energy Efficiency Partnerships
GMDSS	Global Maritime Distress and Safety System
GMN	Global MTCC Network
HAZID	Hazard Identification
HELCOM	Baltic Marine Environment Protection Commission – Helsinki Convention
HKC	Hong Kong Convention
HNS	Hazardous and Noxious Substances
HNS Protocol	Protocol on Preparedness, Response and Co-operation to Pollution Incidents by Hazardous and Noxious Substances, 2000
IALA	International Association of Marine Aids to Navigation and Lighthouse Authorities
IALA WWA	IALA World Wide Academy
IAMSAR Manual	International Aeronautical and Maritime Search and Rescue Manual
ICC	Interregional Coordination Center
IGF Code	International code of safety for ships using Gases or other low-flashpoint Fuels
IHO	International Hydrographic Organization
III Code	IMO Instruments Implementation Code
ILO	International Labour Organization
IMDG Code	International Maritime Dangerous Goods Code
IMLI	IMO International Maritime Law Institute
IMO	International Maritime Organization
IMRF	International Maritime Rescue Federation
IMSAS	IMO Member State Audit Scheme
IMSBC Code	International Maritime Solid Bulk Cargoes Code
IMSSEA	International Maritime Safety, Security and Environment Academy
IMST Fund	International Maritime Security Trust Fund
INTERPOL	International Criminal Police Organization
INTERSPILL	International Oil Spill Forum
IPER	Institut Portuaire d'Enseignement et de Recherche du Havre (Le Havre)
IPIECA	The global oil and gas industry association for environmental and social issues (formerly the International Petroleum Industry Environmental Conservation Association)
IPSAS	International Public Sector Accounting Standards
ISM Code	International Safety Management Code
ISPS Code	International Ship and Port Facility Security Code
ITCP	Integrated Technical Cooperation Programme
ITOPF	International Tanker Owners Pollution Federation Limited
IUU	Illegal, unreported and unregulated [fishing]
JPO	Junior Professional Officer
LC/LP	London Convention/London Protocol
LDCs	Least developed countries
LED	Legal and External Relations Division

LLMC Convention	Convention on Limitation of Liability for Maritime Claims
London Protocol	1996 Protocol to the Convention on the Prevention of Marine Pollution by Dumping of Wastes and Other Matter, 1972, as amended
LNG	Liquefied Natural Gas
LPG	Liquefied Petroleum Gas
LRIT	Long Range Identification and Tracking
MAIP	Marine Accident Investigation Procedures
MARPOL	International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 relating thereto, as amended
MED	Marine Environment Division
MEDEXPOL	Regional Workshop on Response to Spill Incidents involving Hazardous and Noxious Substances
MEPSEAS	Marine Environment Protection for Southeast Asian Seas
MoU	Memorandum of Understanding
MRCC	Maritime Rescue Coordination Centre
MSAIS	Department for Member State Audit and Implementation Support
MSC	Maritime Safety Committee
MSD	Maritime Safety Division
MTCCs	Maritime Technology Cooperation Centres
NIMASA	Nigerian Maritime Administration and Safety Agency
NMTP	National Maritime Transport Policy
Norad	Norwegian Agency for Development Cooperation
OAS-CICTE	Organization of American States – Inter-American Committee against Terrorism
OPRC Convention	International Convention on Oil Pollution Preparedness, Response and Co-operation, 1990
OPRC-HNS Protocol	Protocol on Preparedness, Response and Co-operation to Pollution Incidents by Hazardous and Noxious Substances, 2000
OSPAR Commission	the mechanism by which 15 governments and the EU cooperate to protect the marine environment of the North-East Atlantic
P&I Clubs	Protection and Indemnity Clubs
PACPOL	Pacific Ocean Pollution Prevention Programme
PacWIMA	Pacific Women in Maritime Association
PEMSEA	Partnerships in Environmental Management for the Seas of East Asia
PFSO	Port Facility Security Officer
PIDs	Programme Implementation Documents
PIDSS initiative	Pacific Island Domestic Ship Safety initiative
PSC	Port State Control
PSCO	Port State Control Officer
PSSA	Particularly Sensitive Sea Area
RAC	Regional Activity Center
RCM Africa	Regional Coordinating Mechanism for Africa
REMPEC	Regional Marine Pollution Emergency Response Centre for the Mediterranean Sea
REMPEITC-Caribe	Regional Marine Pollution Emergency Information and Training Center for the Wider Caribbean

ROCRAM	Red Operativa de Cooperación Regional de Autoridades Marítimas de las Americas (Operative Regional Cooperation Network of Maritime Authorities of the Americas)
ROCRAM-CA	Red Operativa de Cooperación Regional de Autoridades Marítimas de Centroamérica y República Dominicana (Operative Regional Cooperation Network of Maritime Authorities for Central America and the Dominican Republic)
ROSCP	Regional Oil Spill Contingency Plan
SAR	Search and Rescue
SDGs	United Nations Sustainable Development Goals
SECROCRAM	Secretariat of the Operative Regional Cooperation Network of Maritime Authorities of the Americas
SENSREC	Safe and Environmentally Sound Ship-recycling in Bangladesh
SIDS	Small Island Developing States
SIMSA	Solomon Islands Maritime Safety Administration
SOLAS	International Convention for the Safety of Life at Sea, 1974, as amended
SPC	Pacific Community
SPREP	South Pacific Regional Environment Programme
STCW Code	Seafarers' Training, Certification and Watchkeeping Code
STCW Convention	International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978, as amended
SUA	Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation, 1988
SCV	Small Commercial Vessels
TC	Technical Cooperation
TC Fund	Technical Cooperation Fund
TCC	Technical Cooperation Committee
TCD	Technical Cooperation Division
TICAD	International Conference on Africa Development
UN	United Nations
UNCTED	United Nations Counter-Terrorism Committee Executive Directorate
UNDAF	United Nations Development Assistance Framework
UNDG	United Nations Development Group
UNDP	United Nations Development Programme
UNEP	United Nations Environment Programme
UNODC	United Nations Office on Drugs and Crime
UNSCR	United Nations Security Council Resolution
UNSOM	United Nations Assistance Mission in Somalia
WIMA Asia	Women in Maritime Association, Asia
WiMAC	Women in Maritime Association, Caribbean
WMU	World Maritime University
WOMESA	Association for Women in the Maritime Sector in Eastern and Southern Africa region

APPENDIX
ITCP Activities 2018

Activity Title	Status	Month Delivered	Location	Outputs	Participating Countries & Territories	Trainees	Fellows	Strategy Officials	TC Fund
REGIONAL PROGRAMMES									
Programme for support to maritime development, Africa									
National workshop on the London Protocol	Completed	June	Luanda, Angola	Participants sensitized in all matters (legal, technical, administrative) of the London Protocol.	Angola	82			Yes
Regional training on oil spill preparedness, response and cooperation	Completed	June	Mombasa, Kenya	Participants gained a better understanding of the challenges commonly faced in managing and coordinating response to an oil spill incident, and increased knowledge of how to prepare for and address these issues.	Comoros, Madagascar, Mauritius, Seychelles, South Africa	30			Yes
Regional training on oil impacted shoreline assessment and response	Completed	November	Dar es Salaam, United Republic of Tanzania	The participants gained a better knowledge of shoreline clean-up strategies appropriate for the type of oil spilled, the type of shoreline impacted and the equipment available, in the context of developing and strengthening National Oil Spill Contingency Plans and Management systems.	Comoros, Kenya, Madagascar, Mauritius, Mozambique, Seychelles, Somalia, South Africa, Uganda, United Republic of Tanzania	38		2	Yes
National workshop and training on contingency planning and oil spill response	Postponed		Mahé, Seychelles						
National workshop on facilitation of maritime traffic and port operations	Postponed		Djibouti, Djibouti						
Regional training course for Maritime Administrators on implementation of the ISM Code	Completed	September	Lagos, Nigeria	Participants trained to conduct shipboard and shore-based audits for verification of compliance with the requirement of the ISM Code.	Angola, Cabo Verde, Equatorial Guinea, Gambia, Ghana, Guinea-Bissau, Liberia, Namibia, Nigeria, Sao Tome and Principe, Sierra Leone	37			Yes
National stakeholders workshop on the review of Zambia maritime legislation in relation to regulations	Postponed		Lusaka, Zambia						
Provision of IMO publications to selected maritime training institutes	Completed	December	Ethiopia, Kenya, Liberia, Nigeria	IMO publications provided to Ethiopian Maritime Affairs Authority; Bandari College, Kenya; Liberia Maritime Training Institute; and NIMASA, Nigeria.	Ethiopia, Kenya, Liberia, Nigeria				Yes
National stakeholders workshop on the safety of domestic passenger ferries and fishing vessels	Completed	May	Victoria, Seychelles	Participants familiarized with the concepts and principles of safety regulations. The knowledge, skills and competences of officials directly responsible for the education and training of fishermen were enhanced.	Seychelles	29			No

Activity Title	Status	Month Delivered	Location	Outputs	Participating Countries & Territories	Trainees	Fellows	Strategy Officials	TC Fund
Programme for support to maritime development, Africa - continued									
National workshop for senior maritime officers from Federal Government of Somalia (FGS) and regional administration	Completed	August	Kigali, Rwanda	Communiqué adopted tasking the Minister for Ports and Marine Transport, Federal Government of Somalia to take appropriate steps to ensure the restructuring of the current Marine Department of the Ministry to a Department of Maritime Administration within the Ministry.	Somalia			21	Yes
Review and update the Maritime Pollution Bill of Sierra Leone	Completed	May	Accra, Ghana	The Maritime Pollution Bill was reviewed and updated to incorporate the provisions of the Ballast Water Management Convention, to assist Sierra Leone discharge its functions as a Flag, Port and Coastal State.	Sierra Leone				Yes
3rd Regional SAR Committee Meeting	Completed	July	Mombasa, Kenya	Participants' knowledge increased with respect to search and rescue administration, in particular MRCCs, giving insight into what is required in setting up an effective and efficient SAR system.	Kenya, Seychelles, Somalia, United Republic of Tanzania	16			Yes
Regional SAR coordination training course IAMSAR Vol II	Completed	July	Mombasa, Kenya	Participants trained to apply "best practice" when tasked with SAR Coordinator responsibilities.	Kenya, Seychelles, Somalia, United Republic of Tanzania	16			Yes
4th conference of the Association of African Maritime Administrations	Completed	September	Sharm El Sheik, Egypt	Participants acquired an improved understanding of the latest developments in maritime/shipping especially the implementation of the AU 2050 AIM Strategy.	Algeria, Angola, Benin, Burundi, Cabo Verde, Cameroon, Comoros, Congo, Côte d'Ivoire, Democratic Republic of the Congo, Djibouti, Egypt, Equatorial Guinea, Eritrea, Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Liberia, Libya, Madagascar, Malawi, Mauritania, Mauritius, Morocco, Mozambique, Namibia, Nigeria, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, Sudan, Togo, Tunisia, United Republic of Tanzania, Zambia, Zimbabwe			44	Yes
Combined training course for instructors, assessors and administrators based on IMO model course 3.12	Completed	October	Monrovia, Liberia	Participants gained knowledge on: IMO Model course 3.12 - to organize assessments/examinations, issue and control certificates; and IMO Model course 6.09 - to plan and prepare effective teaching and instructions by selecting appropriate methods of instruction and teaching material.	Liberia	17			Yes
National workshop on the implementation of IMO conventions into the domestic legislation and ratification and domestication of IMO conventions and protocols	Completed	October	Lagos, Nigeria	Enhanced understanding of IMO conventions and how they need to be implemented and enforced in national legislation. Draft documents prepared by the Ministerial Committee on the domestication of IMO conventions and protocols and related matters reviewed.	Nigeria	55			Yes

Activity Title	Status	Month Delivered	Location	Outputs	Participating Countries & Territories	Trainees	Fellows	Strategy Officials	TC Fund
Programme for support to maritime development, Africa - continued									
Needs assessment on legislative review of the inland water sector	Postponed								
Basic GMDSS training for MRCC personnel	Completed	November	Lagos, Nigeria	Increased competency and confidence for the trainees in the application of best practice as SAR coordinators.	Nigeria	41			No
SAR organization and management course on IAMSAR Volume 1 for SAR coordinators personnel	Completed	October	Rabat, Morocco	Improved internal infrastructure processes and systems for the coordination centres and sub-centres and increased management awareness of the structure require to operate and run an MRCC.	Benin, Cabo Verde, Cameroon, Congo, Côte d'Ivoire, Equatorial Guinea, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Liberia, Morocco, Nigeria, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, Togo, Uganda, United Republic of Tanzania	32			No
Regional SAR mission coordination training course IAMSAR Vol II	Completed	November	Antananarivo, Madagascar	Increased competency and confidence for the trainees in the application of best practice as SAR coordinators.	Madagascar, Mozambique, Namibia, South Africa	29			No
Training course for SAR coordinators from MRCC Rabat, Morocco	Completed	December	Bremen, Germany	Increased competency and confidence for the trainees on the application of best practice as SAR coordinators.	Morocco	12			No
Regional SAR Committee meeting for North, West and West Africa and regional workshop on Mass Rescue Operations	Completed	December	Rabat, Morocco	Developed capacity-building partnerships with governments, organizations and industry in the region. Improved the delivery, utilisation and effectiveness of its technical cooperation programmes.	Cabo Verde, Côte d'Ivoire, Gambia, Ghana, Guinea, Guinea-Bissau, Liberia, Mauritania, Senegal, Sierra Leone	10			No
Third meeting of the five Africa Regional SAR Coordinators	Completed	November	Rabat, Morocco	Capacity-building partnership developed with governments, organizations and industry in the region.	Kenya, Liberia, Morocco, Nigeria, South Africa	10			Yes
National seminar to promote the ratification and effective implementation of the FAL Convention	Completed	March	Maputo, Mozambique	Participants awareness increased on the FAL Convention. Participants gained a better understanding of the concept of the Single Window, and of the electronic data processing and interchange techniques for the clearance of ships, persons and cargoes.	Mozambique	35			Yes
National seminar on flag State implementation	Completed	February	Addis Ababa, Ethiopia	Participants gained a better knowledge of maritime administrations in respect of flag State obligations and responsibilities under the different international maritime instruments.	Ethiopia	28			Yes
National workshop on STCW	Completed	May	Addis Ababa, Ethiopia	Participants familiarized with the recent amendments to the STCW Convention and Code with the prime focus on the 2010 Manila amendments.	Ethiopia	26		1	Yes
Regional workshop on the ratification and implementation of the AFS Convention and the implementation of the Biofouling Guidelines	Completed	November	Abidjan, Côte d'Ivoire	Participants familiarized with the key aspects of the AFS Convention and the Biofouling Guidelines, in particular, on the national responsibilities and steps towards implementation and ratification, through presentations on the relevant technical and administrative provisions.	Benin, Cameroon, Comoros, Congo, Côte d'Ivoire, Democratic Republic of the Congo, Gabon, Guinea, Mauritania, Senegal, Togo	28			Yes

Activity Title	Status	Month Delivered	Location	Outputs	Participating Countries & Territories	Trainees	Fellows	Strategy Officials	TC Fund
Programme for support to maritime development, Africa - continued									
Regional workshop on the MARPOL Convention	Completed	November	Abidjan, Côte d'Ivoire	Participants gained greater understanding and knowledge of the process for the implementation and enforcement of the Annexes I-V of the MARPOL Convention.	Benin, Cameroon, Comoros, Congo, Côte d'Ivoire, Gabon, Guinea, Mauritania, Senegal, Togo			29	Yes
National workshop on facilitation of maritime traffic and port operations	Completed	November	Nouakchott, Mauritania	Participants familiarised with the processes and procedures for the facilitation of maritime traffic as well as port operations.	Mauritania	23			Yes
National workshop on the implementation of IMO conventions into the domestic legislation	Postponed		Antananarivo, Madagascar						
Subregional workshop on shoreline response to oil spills	Completed	May	Swakopmund, Namibia	Participants provided with a comprehensive understanding on how to develop a shoreline clean-up management plan.	Angola, Cabo Verde, Gambia, Ghana, Liberia, Namibia, Nigeria, Sierra Leone, South Africa	43			Yes
Subregional training course on the carriage and handling of dangerous goods (IMDG and IMSBC Codes)	Postponed		Senegal						
National OPRC Level 2 training course	Completed	May	Swakopmund, Namibia	Key stakeholders of the National Oil Spill Contingency system were provided with the practical and technical knowledge to plan and conduct an effective response to an oil spill.	Namibia	30			Yes
Subregional workshop on the ratification and effective implementation of IMO conventions relating to oil pollution	Postponed		Abidjan, Côte d'Ivoire						
National workshop to strengthen the national system for preparedness and response to oil spills	Completed	October	Cotonou, Benin	The workshop provided delegates with essential knowledge and skills to develop strategy and policy to implement an effective preparedness and response system; networking opportunities between delegates from various government agencies, the private sector and other stakeholders to enhance cooperation and to stimulate a cooperative approach to oil spill preparedness and response.	Benin			29	Yes
National workshop to strengthen the national system for preparedness and response to oil spills	Cancelled		Kinshasa, Democratic Republic of the Congo						
Basic GMDSS training for MRCC personnel Congo and installation of equipment and tools for the MRCC	Completed	June	Pointe Noire, Congo	Skills of the MRCC personnel enhanced in GMDSS, and communication equipment sponsored and installed by IMO.	Congo	15			No
National workshop and assessment mission to identify IMO's support to the Single Window	Completed	December	Yaoundé, Cameroon	Participants trained on the maritime single window, and list of recommendations agreed to integrate the expected functionalities of the Maritime Single Window in the existing e-GUCE platform.	Cameroon	25			Yes

Activity Title	Status	Month Delivered	Location	Outputs	Participating Countries & Territories	Trainees	Fellows	Strategy Officials	TC Fund
Programme for support to maritime development, Africa - continued									
National workshop on port State control	Postponed		Antananarivo, Madagascar						
Regional Train-the-Trainer course for the ECDIS Instructors (IMO Model Course 1.27)	Completed	November	Marseille, France	Instructors from maritime education and training institutions who are responsible for ECDIS training, were trained on the IMO Model course 1.27 to meet the standards of the STCW Code.	Côte d'Ivoire, Mauritania, Senegal	9			Yes
Regional seminar on stowaways in west and central Africa - analysis of the current situation and measures to reduce the number of stowaways	Completed	March	Yaoundé, Cameroon	Participants gained a better understanding of the wider problem associated with stowaways, in particular humanitarian aspects, costs related to their repatriation, administrative burden for all stakeholders dealing with the resolution of stowaway cases, as well as the risk to life and safety of the stowaways themselves.	Cameroon, Côte d'Ivoire, Djibouti, Ghana, Kenya, Nigeria, Senegal, South Africa	61		5	Yes
Programme for support to maritime development, Arab States & Mediterranean									
National workshop on the implementation of the London Protocol	Postponed		Algeria						
Regional workshop on Response to Spill Incidents Involving HNS (MEDEXPOL 2018)	Completed	June	Valletta, Malta	Participants agreed upon the revised Guide for risks of gaseous releases resulting from maritime accidents, as amended by the workshop, for its submission to the Thirteenth Meeting of the Focal Points (REMPEC) in June 2019, for approval, and endorsed a set of recommendations for future developments on HNS response guidelines and tools, including the production of a Joint Inter-Regional HNS Response Manual between the Bonn Agreement, HELCOM and REMPEC.	Albania, Algeria, Bosnia and Herzegovina, Croatia, Cyprus, Egypt, France, Greece, Israel, Italy, Lebanon, Libya, Malta, Monaco, Morocco, Slovenia, Spain, Syrian Arab Republic, Tunisia, Turkey	16			Yes
Regional workshop on ratification and effective implementation of MARPOL Annex VI	Completed	December	Valletta, Malta	Enhanced awareness, knowledge and skills of participants on relevant aspects of MARPOL Annex VI; Initiated the process for countries to ratify, implement and/or enforce MARPOL Annex VI.	Albania, Algeria, Bosnia and Herzegovina, Croatia, Cyprus, Egypt, France, Greece, Israel, Italy, Lebanon, Libya, Malta, Monaco, Montenegro, Morocco, Slovenia, Spain, Syrian Arab Republic, Tunisia, Turkey	27			Yes
