# LOW COST, LOW TECHNOLOGY COMPLIANCE MONITORING

ASSESSMENT OF PERMIT COMPLIANCE FOR DISPOSAL OF  
WASTE AND OTHER MATTER AT SEA

2017 EDITION

Available online  
as a download

The objective of this publication is to provide practical information about using low cost and low technology approaches that are useful for monitoring compliance with permit conditions associated with ocean disposal of waste materials or other matter. The primary audiences for this guidance are countries that are in the early stages of developing waste assessment and monitoring actions in concert with permit programmes for disposal of wastes and other matter into marine waters.
