

IMDG CODE

What is in it: The IMDG Code lays down basic principles on the transport of dangerous goods by sea. It contains detailed recommendations for individual substances, materials and articles and a number of recommendations for good operational practice, including advice on terminology, packing, labelling, stowage, segregation and handling and emergency response action.

Who uses it: Although the information in the Code is directed primarily at the mariner, its provisions may affect a range of industries and services, such as manufacturers, packers, shippers, feeder services such as road and rail and port authorities.
