

# **GUIDELINES ON LOW COST, LOW TECHNOLOGY ASSESSMENT OF DREDGED MATERIAL**

2015 EDITION

## **Addendum**

December 2015

### **Acknowledgments**

These guidelines were prepared by a London Convention and Protocol working group, under the chairmanship of Dr. Andrew Birchenough (United Kingdom). Members of the working group included representatives from Australia, Canada, Egypt, China, the Netherlands, Republic of Korea, Thailand, United Kingdom, United States and the World Organization of Dredging Associations (WODA).

The development of the guidelines were supported by funding kindly provided by the United States Government and the International Association of Ports and Harbors (IAPH) and in-kind contributions from Central Dredging Association (CEDA), allowing for a contract with the Centre for Environment Fisheries and Aquaculture Science (Cefas, United Kingdom). Under this contract, Dr. Andrew Birchenough (Cefas) was the lead author, with contributions from Adrian Judd, Lara Howe and Sara Pacitto (Cefas) and Neville Burt (environmental consultant).
