

Installation Instructions

Important:

After installing the IMO Bookshelf, you need to unlock the eBooks before you can access them (see step 5).

Your licence code (READ-...) will allow unlocking only the eBooks that have been purchased, NOT ALL the eBooks on the CD.

If you have installed a previous edition of the IMO Bookshelf (eBook Reader v4.4 of July 2011, v4.7, v5.2, v5.3, v5.4, v5.5, v5.6, v5.7,v5.8, v5.9, v5.10, v5.11 or v5.12), this disk will upgrade the software to version 5.13.

Existing eBooks will be updated for any supplement, corrigendum or errata. New published eBooks will be added to the list available for purchase.

The IMO bookshelf will be supplied either on a CD ROM or as a ZIP file, see Installation Procedure Steps 1A (CD ROM) and 1B (ZIP FILE) depending on what version you have.

This version (v5.13) of the IMO Bookshelf supersedes the August 2021 Version (V5.12).

System Requirements:

- Windows XP SP2/SP3, Windows Vista, Windows 7, Windows 8 / 8.1 / 8.1 update (except RT Tablets) and Windows 10 Operating System (32-bit or 64-bit).
- Microsoft .NET Framework 2.0, 3.0, 3.5, 4, 4.5 or 4.6 (always preinstalled, except on Windows XP where .NET 2.0 must be installed manually first in the unlikely situation where it is not installed already).
- Hard Disk space required by the program: approx. 700 MB.
- Minimum 1024x 768 resolution.
- For CD ROM ONLY - CD/DVD drive (only to install the program). Note that the content of the CD/DVD can be transferred to another media like a USB memory stick for installation on laptops without CD/DVD drive (just make sure to select *all* the files, including the *hidden* files).

Installation Procedure:

1A) If you have been supplied the IMO Bookshelf on a CD ROM

Insert CD ROM into CD/DVD drive.

If the installation program does not begin automatically after a few seconds, follow these steps to start it:

- Double-click on the My Computer/Computer icon.
- Double-click on the CD/DVD-Rom icon or right-click (single-click) on it and choose the menu 'Open'.
- Double-click on **SETUP.EXE**

1B) If you have downloaded the IMO Bookshelf in a ZIP file

Locate the ZIP file on your PC, this will normally be in your Downloads folder.

Right-click on the ZIP file and select 'Extract Files' from the menu - this will extract the IMO Bookshelf installation files into a standard windows folder in the same location as the ZIP file and also named the same as the ZIP file.

Once the extraction process is complete open the STANDARD windows folder and Double-click on **SETUP.EXE**

NOTE: DO NOT RUN THE **SETUP.EXE** DIRECTLY FROM FROM THE ZIP FILE.

1. Once the installation program starts, it will check for some necessary software on your PC.
 - Press **Next** at the *Welcome* screen.
 - Check the box "I accept the terms in the License Agreement" and press **Next**.
 - Press **Next** at the *Destination Folder* screen to install the program in **C:\Program Files\Seamanship E-book Reader**. This is the default folder with Windows XP, Vista and Windows 7-8-10 if you have full administrative rights on your PC.
On 64-bit Operating Systems **C:\Program Files (X86)** is used instead.
If you have Windows Vista / Windows 7-8-10 without admin rights then the default folder is changed to **C:\Apps\Seamanship E-book Reader**.
You can modify this default installation directory if you wish but write access to the folder is required.
 - Press **Install** at the *Ready to Install eBookReader v5* screen.
 - Wait while the program files copy (*Installing eBookReader v5*)
 - After the eBook Reader program is installed, the eBooks installation/update starts automatically (*eBook Installer*).
Due to the size of the Bookshelf, this can take a while. Press **OK** when completed.
 - Press **Finish** at the *Completed the eBookReader v5 Setup Wizard* screen.
2. Once the eBooks are installed, remove the CD ROM (If applicable) from your CD drive. Neither the CD or ZIP file are required to run the program.
3. Start the program either by double-clicking on the icon 'The IMO Bookshelf' on the desktop or from the Start Menu (**eBook Reader** or **The IMO Bookshelf**, depending on your Windows operating system version).
4. Before you can access an eBook for the first time you must obtain an unlock code. Follow the on-screen instructions on how to unlock the eBook. You will require the licence code that has been given by your IMO distributor or our website.

The licence code begins with **READ-XXXX-XXXX-XXXX-XXXX** (where XXXX is a unique sequence of characters).

The eBooks on this CD/ZIP file are single-user versions intended for use by one person on a single computer only.

Uninstall the program:

Go to **Start menu** → **Control Panel** → **Programs & Features (or Add/Remove programs)**. Select IMO Bookshelf v5 or eBookReader v5. Press [Remove].

Technical Support:

For extra information, please read the manual accessible from the program.

In the event of any questions or issues during the installation, please go to our support page: www.witherbydigital.com/support

Or you can e-mail us at: techhelp@witherbys.com
